

# Understanding Group Dynamics

When working on complex tasks, you cannot do them all yourself. Organizations use groups and teams to make decisions, solve problems, and accomplish goals. A **group** is made up of two or more people who interact with each other, share expectations and obligations, and develop a common identity as a group. Real groups, as opposed to random collections of individuals, also have social or professional bonds and common interests, values, or backgrounds. The way that people work and interact with each other is known as **group dynamics**. Other terms used to describe groups include “teams,” “clubs,” and “committees.”  Before the new company group meets for the first time, Omar suggests that you learn about the benefits of successful groups.

## DETAILS

Organizations are embracing group projects and teamwork for the following reasons:

- Diversity**  
 A group of people can bring a rich diversity of culture, age groups, and other variables to a common table. This diversity gives a group a more varied perspective and appreciation for different ideas and enhances the types of solutions it can come up with. Figure 4-1 illustrates the types of expertise group members can offer when discussing a topic or solving a problem.
- Rich experience base**  
 Each member of a group brings unique experiences with them. This includes differences in formal and informal education, work experience, responsibilities, and exposure to ideas from outside of the organization. Bringing together a group of people with a rich set of experiences can be very powerful.
- Enhanced organizational memory**  
 Organizations have a unique history and culture that a group must function in. People who have worked for a company for some time develop an **organizational memory** as they learn about the various processes, personalities, and subtleties of how the organization operates. When a group is formed, it can take advantage of its rich organizational memory: Someone on the team is likely to know who to talk with, what resources are available, or how to get something done. See Figure 4-2.
- Error detection**  
 When you bring people together to work on a common task, you introduce multiple levels of error checking. Mistakes and omissions that may have otherwise gone unnoticed are more likely to be caught by other team members.
- More creative solutions**  
 Each individual in a group will approach a problem differently than everyone else. This leads to a larger number of unique and creative solutions. Functional teams can be an excellent source of ideas.
- Greater acceptance of decisions and outcomes**  
 When someone is involved in a decision-making process, they are more likely to accept and support its outcome. Committees are often formed when broad acceptance of an outcome is necessary. Even those who are not part of the group will be more accepting if someone from their department or work unit is involved in the decision process.

### QUICK TIP

Organizational memory can include an organization's physical archives, electronic databases, and members' knowledge.
