

Introduction

Chemistry 126 has been designed to increase the student's knowledge and understanding of the material covered in Chemistry 122 and to further enhance laboratory techniques performed in Chemistry 121.

Experiment 1 is a "dry" lab where students are introduced to Microsoft Excel. This will allow students to efficiently create spreadsheets, manipulate large data sets and to create graphical visualizations.

Experiment 2 demonstrates the lab techniques required to successfully complete several experiments in this course. The remaining experiments in this course cover the following topics: Chemical Kinetics, Chemical Equilibria, Acids and Bases, Entropy and Free Energy and Electrochemistry.

You are advised to consult your Chemistry 122 textbook and lecture notes to aid you in understanding the laboratory experiments. Additional help may be obtained from any of a number of first year text books in the SFU library.

Note that you are responsible for reading all the information regarding the laboratory in the subsequent pages.
