

Chapter 11: Counting Methods and Probability Theory

Section 11.1 The Fundamental Counting Principle

Objective 1 – Use the Fundamental Counting Principle to determine the number of possible outcomes in a given situation.

The Fundamental Counting Principle with More Than Two Groups of Items

Definition

The number of ways in which a series of successive things can occur is found by multiplying the number of ways in which each thing can occur.

The number of possible outfits from 2 pairs of jeans, 3 T-shirts and 2 pairs of sneakers are:

$$2 \cdot 3 \cdot 2 = 12$$

Fundamental Counting Principle

Definition: If you can choose one item from a group of M items and a second item from a group of N items, then the total number of two-item choices is $M \cdot N$.
