**American Book Publishing Record** ,2003     Abstracts of Popular Culture ,1977     **Subject Guide to Books in Print** ,2001     The SAGE Glossary of the Social and Behavioral Sciences Larry E. Sullivan,2009-08-31 The SAGE Glossary of the Social and Behavioral Sciences provides college and university students with a highly accessible curriculum driven reference work both in print and on line defining the major terms needed to achieve fluency in the social and behavioral sciences Comprehensive and inclusive its interdisciplinary scope covers such varied fields as anthropology communication and media studies criminal justice economics education geography human services management political science psychology and sociology In addition while not a discipline methodology is at the core of these fields and thus receives due and equal consideration At the same time we strive to be comprehensive and broad in scope we recognize a need to be compact accessible and affordable Thus the work is organized in A to Z fashion and kept to a single volume of approximately 600 to 700 pages     Bibliographic Guide to Psychology New York Public Library. Research Libraries,1999     The Story Paradox Jonathan Gottschall,2021-11-23 Storytelling a tradition that built human civilization may soon destroy it Humans are storytelling animals Stories are what make our societies possible Countless books celebrate their virtues But Jonathan Gottschall an expert on the science of stories argues that there is a dark side to storytelling we can no longer ignore Storytelling the very tradition that built human civilization may be the thing that destroys it In *The Story Paradox* Gottschall explores how a broad consortium of psychologists communications specialists neuroscientists and literary quants are using the scientific method to study how stories affect our brains The results challenge the idea that storytelling is an obvious force for good in human life Yes storytelling can bind groups together but it is also the main force dragging people apart And it is the best method we ve ever devised for manipulating each other by circumventing rational thought Behind all civilization s greatest ills environmental destruction runaway demagogues warfare you will always find the same master factor a mind disordering story Gottschall argues that societies succeed or fail depending on how they manage these tensions And it has only become harder as new technologies that amplify the effects of disinformation campaigns conspiracy theories and fake news make separating fact from fiction nearly impossible With clarity and conviction Gottschall reveals why our biggest asset has become our greatest threat and what if anything can be done It is a call to stop asking How we can change the world through stories and start asking How can we save the world from stories     *The Evolution of Religion and Morality* Martin Lang,Benjamin Grant Purzycki,Joseph Henrich,Ara Norenzayan,2023-12-04 This volume draws on a unique dataset to answer pressing questions about human religiosity Building upon the first volume in this series it presents results from the second phase of the Evolution of Religion and Morality ERM project The second volume investigates key questions in the evolutionary and cognitive sciences of religion and highlights cultural variability and context specificity of diverse religious systems Chapters draw on a dataset comprising 2 228 participants from 15 ethnographically diverse societies that stretch

from Africa and India through Oceania to South America and include hunter gatherers pastoralists horticulturalists subsistence farmers and wage laborers Four chapters using the full dataset answer the following questions What are the general predictors of commitment to supernatural agents Is there a gender gap in religiosity Does belief in punitive gods facilitates cooperation Are supernatural agents implicitly associated with moral concerns Chapters from individual field sites further explore the distinction between moralizing and local gods the potentially disruptive role of belief in local gods on cooperation with anonymous co religionists and the relationship between belief in moralizing gods cooperation and differential access to material resources Above these empirical studies the book also includes an informed discussion with specialists on the challenges of running such a large cross cultural project and gives concrete recommendations for future projects The Evolution of Religion and Morality Volume II will be a key resource for scholars and researchers of religious studies human evolutionary biology psychology anthropology the cultural evolution of religion and the sociology of religion This book was originally published as a special issue of Religion Brain Behavior *Psychology Today*, 1985 *American Book Publishing Record Cumulative, 1950-1977* R.R.
