**Care of Adults with Chronic Childhood Conditions** Mariecel Pilapil, David E. DeLaet, Alice A. Kuo, Cynthia Peacock, Niraj Sharma, 2016-11-24 This book addresses the unique healthcare needs of adults with chronic childhood illnesses. It presents a model of primary and secondary prevention for emerging adulthood: primary prevention in which all young adults are screened for high risk behaviors and health needs, and secondary prevention in which young adults with chronic childhood conditions are optimized through coordinated care connections to community resources and social family support. This book is organized in five parts. Part I provides a detailed overview of the health care transition from pediatrics to adult medicine from both a policy and practice perspective. In Part II the concept of emerging adulthood as a developmental period is explored and strategies for providing improved comprehensive care for this age group are discussed. Part III reviews specific chronic childhood conditions such as attention deficit hyperactivity disorder, autism, cystic fibrosis, and diabetes mellitus and offers clinical cases and summary reports that can be used as a quick guide to each condition. In Part IV additional clinical considerations that are not necessarily condition specific but are highly relevant to the care of young adults with chronic childhood conditions are examined. Part V describes the socio legal issues involved in caring for this population. **Care of Adults with Chronic Childhood Conditions** provides primary care providers with a new framework for the care of young adults and identifies opportunities to influence patient health outcomes over a life trajectory.
