Boys Stuff:

Boys, Bodies, and Physical Education Göran Gerdin, 2017-01-12 Using visual ethnography this book explores the many forms of pleasures that boys derive in and through the spaces and their bodies in physical education Employing the works of Michel Foucault and Judith Butler Gerdin examines how pleasure is connected to identity schooling and power relations and demonstrates how discourses of sport fitness health and masculinity work together to produce a variety of pleasurable experiences At the same time the book provides a critique of such pleasurable experiences within physical education by illustrating how these pleasures can still for some boys quickly turn into displeasures and can be associated with exclusion humiliation bullying and homophobia Boys Bodies and Physical Education argues that pleasure can both be seen as an educational and productive practice in physical education but also a constraint that both engenders and privileges some boys over others as well as re producing narrow and limited conceptions of masculinity and pleasures for all boys This book works to problematize these pleasures and their articulations with gender bodies and spaces Sam E. The articles in this book engage with practical issues relating to teaching and research The way in which gender and education is theorized is currently in a period of profound change and this presents a major challenge to feminist teachers who want to translate explanations for gender relations into transformative action in the classroom Several of the authors in this collection consider the possibilities and practicalities of transformative feminist pedagogies identifying the pedagogic

moments into which challenge and change can be introduced without distorting or denying the students experience Another section contains articles which present the results of classroom research dealing with issues of class gender race and sexuality We can see from the results of these recent studies that class race and gender continue to position students differently throughout the whole school and the entire curriculum Research on teacher education reported here indicates that gender differences are produced and reproduced in that context A final section of the book deals with the ongoing and lively debate on feminist methodology and epistemology indicating the variety of approaches and positions that are being taken up in this area
