The Brain Changers Maya Pines,1973 **Brain Changers** David P. Sortino,2020-01-13 **Brain Changers** The Most Important Advances in Children s Learning and Intelligence represents my second book of The Brain Smart Trilogy This book presents an in depth look at successful learning techniques and current brain research about how to increase children s learning potential at all age levels In my opinion the words brain changing supports an often ignored yet obvious concept that children learn best when they are interested or passionate about learning Our brain s limbic system knows this when it forms emotional connections or attachment bonding to learning For example a major area of our brain associated with the brain changing concept is called the hippocampus In fact the hippocampus is the only part of your child s learning brain where neurons regenerate or make more neurons The medical world connects this positive brain changing experience and calls it brain plasticity or the brain s ability to modify its connections or rewire itself Studies show that without this ability any brain not just the human brain would be unable to develop from infancy to adulthood In my opinion this book s information provides readers with up to date brain research and proven learning techniques to support my brain changing thesis for all individuals interested in helping children reach high levels of learning The Brain-changers Maya Pines,1973

Brain Changer David Disalvo,2013-11-12 Let's be honest You've tried the sticky note inspirations the motivational calendar and the cute but ineffective carpe diem mug yet your attitude hasn't changed It's time to apply cutting edge science to the challenges of daily life While everyone desires self improvement we are quickly frustrated when trying to implement the contradictory philosophies of self appointed self help gurus Too often their advice is based on anecdote and personal opinion not real research Bestselling author of *What Makes Your Brain Happy and Why You Should Do the Opposite* David DiSalvo returns with *Brain Changer* How Harnessing Your Brain's Power to Adapt Can Change Your Life Drawing on the latest research in neuroscience cognitive psychology behavioral economics communications and even marketing DiSalvo replaces self help with science help He demonstrates how the brain's enormous capacity to adapt is the most crucial factor influencing how we feel and act a factor that we can control to change our lives Findings show our brains are fluid and function much like a feedback loop stimulants from both our environment and from within ourselves catalyze changes in the brain's response That response then elicits additional inputs that the brain identifies and analyzes to further tailor its response DiSalvo shows that the greatest internal tool we have to affect the feedback loop is metacognition thinking about thinking Littered with relatable examples and tackling major aspects of our lives including relationships careers physical health and personal development *Brain Changer* shows you how to harness metacognition to enrich your life
