*Brancusi* Constantin Brancusi, Peggy Guggenheim Collection, 2005 This catalog published in conjunction with the Peggy Guggenheim Collection of Venice documents the first major exhibition of Brancusi the photographer While Brancusi's attraction to the medium is well known his photographs have always been seen as secondary to his other studio work But the 96 photographs collected in this volume are to be seen as an oeuvre in their own right formally autonomous showing exceptional aesthetic and technical quality The book opens new dimensions in space and time of Brancusi's work especially for three plaster works featured The Sleeping Muse The Torso of a Youth and The Baroness The exceptional quality and openness of Brancusi the photographer gives vantage points on the aesthetic world beyond the realm of his bronze marble or wooden works

The Studio Reader Mary Jane Jacob, Michelle Grabner, 2010-06-15 The image of a tortured genius working in near isolation has long dominated our conceptions of the artist's studio Examples abound think Jackson Pollock dripping resin on a cicada carcass in his shed in the Hamptons But times have changed ever since Andy Warhol declared his art space a factory artists have begun to envision themselves as the leaders of production teams and their sense of what it means to be in the studio has altered just as dramatically as their practices The Studio Reader pulls back the curtain from the art world to reveal the real activities behind artistic production What does it mean to be in the studio What is the space of the studio in the artist's practice How do studios help artists envision their agency and beyond that their own lives This forward thinking anthology features an all star array of contributors ranging from Svetlana Alpers Bruce Nauman and Robert Storr to Daniel Buren Carolee Schneemann and Buzz Spector each of whom locates the studio both spatially and conceptually at the center of an art world that careens across institutions markets and disciplines A companion for anyone engaged with the spectacular sites of art at its making The Studio Reader reconsiders this crucial space as an actual way of being that illuminates our understanding of both artists and the world they inhabit

*Sculpture and Film* Jon Wood, Ian Christie, 2006-02-02 During much of the twentieth century film was often assumed to be a flat pictorial art more often compared with painting and graphic media than with sculpture In the last few decades however film has come to be more closely associated with sculpture and in recent years it has largely been through gallery installations not only that the sculptural aspect of film and video has been demonstrated but also the extent to which filmic representation enlarges our understanding of sculptural space This collection thus comprises the first rigorous exploration of the relationship between sculpture and film charted over ten essays The contributors explore some of the ways in which cinema reshaped the landscape of art and specifically sculpture and sculptural practice during the twentieth century They also examine how film has functioned as a sculptural medium at crucial moments in various stages of its evolution In this way it is a book about both sculpture and film and sculpture as film

*The Original Copy* Roxana Marcoci, Geoffrey Batchen, Tobia Bezzola, 2010 Since its birth in the first half of the 19th century photography has offered extraordinary possibilities of isolating works of art for

study and pleasure Through cropping focus angle of view distance and lighting as well as the ex post facto techniques of dark room manipulation collage montage and assemblage photographers not only interpret the artworks they record but create stunning reinventions The Original Copy Photography of Sculpture 1939 to Today presents a critical examination of the intersections between photography and sculpture Through a selection of nearly 300 outstanding pictures by more than 100 artists from the 19th century to the present The Original Copy explores how one medium has become implicated in the understanding of the other Photographs reproduced in this richly illustrated volume range in subject from inanimate objects to performing bodies and include major works by medium s most influential artists from early modernism to the present
