Curriculum Leadership Case Studies For Program Practitioners:

Curriculum Leadership David S. Martin, 1989 The 22 case studies in this book offer a variety of real life school controversies designed to provoke dialogue among students and practitioners The problems presented here demonstrate the inter relatedness of curriculum decision making and problem solving with other educational system functions The case studies are grouped according to five themes 1 curriculum decision making 2 curriculum implementation 3 issues in personnel and curriculum 4 programs for special populations and 5 curriculum evaluation Each case study describes a situation actually experienced by one or more curriculum leaders such as responding to parent objections about classroom materials taking the initiative in improving student test scores revising the curriculum to meet special student needs resolving the dilemma of curriculum ownership and coping with the need to reduce expenditures without damaging the core of the curriculum Each case study includes a brief description of the setting a narrative of relevant events and actions and a list of questions focused on key issues The cases contain neither solutions nor suggestions for possible solutions An appendix offers a summary of issues pertaining to each case MLH **Resources in Education** ,2000-10 **Curriculum**

Dan Marshall, 2007 Turning Points in Curriculum A Contemporary American Memoir 2nd edition is a text designed to engage readers in a story of curriculum as a field of intellectual study and invite them to identify with and ultimately participate in this important work Focusing on the United States it contains five parts the first of which offers a backdrop or contextual panorama for parts two through five

which present curriculum's journey through the last half of the twentieth century Throughout the book the authors use the term curriculum work over curriculum studies theory or development The broader notion of work allows for variations that include reflection study theorizing construction inquiry and deliberation At the same time the possibilities for interpretation inherent in the notion of curriculum work allow the authors to steer clear of the more fixed and differential meanings typically associated with more distinctive phrases such as curriculum theorizing or curriculum development An important goal of *Turning Points* is to provide readers with multiple levels of engagement in its complex conversation Toward this end the authors have combined five distinct elements into the book with an eye toward personalizing readers' interpretative processes
