

Math 136 - Super Awesome and Fun Project

As I began to gather information for this project I started to notice a pattern between many people. Many of the people I asked were people that lived in houses with around 1,000 square feet house to 2,000 square foot houses. Something that was uncommon was the amount of pets the people had, it was very uncommon to have more than 10 pets, many people claimed to have lots of birds, hamsters, and rabbits. I never thought that was something common to have like cats and dogs. I gathered this research by looking at 30 of my friends and family's houses and asking how many pets have they owned living in their houses.

Number of pets v.s House Square Football

The graph above shows that the data does not exhibit any noticeable patterns. Although it seems at first that there is no relationship between the data, there does appear to be a moderate positive tendency.
