Illust. 4. Correct connecting rod bearing installation.

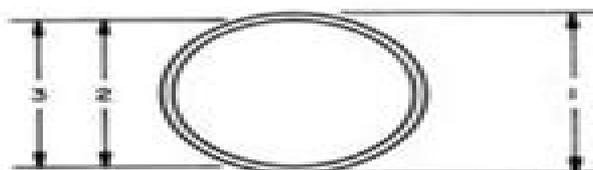

When correctly positioned, the connecting rod cap bearing half will stand out  $1/32$  inch on both sides above the cap surface and engage inside the rod half bore. See Illust. 4.

Install connecting rod assemblies in the engine so that the ribs on the connecting rod bearings face the camshaft, regardless of where the connecting rod number is stamped.

## Camshaft Bearing Installation

When installing the front and rear bearings ensure that the edges marked 'FRONT' are to the front of the engine and that the holes in the bearings line up with the oil passages in the crankcase. The holes in the center bearing are equal distance from either edge. There is no front marking, but the oil holes must line up with the oil passages.

Press the center bearing into position first, then the other bearings. The rear bearing must be pressed in flush with the front of the bore in the crankcase.
