Imperialism, Colonial Power

Imperialism is the extension of a nation's power over other lands.

Colonies are land occupied and operated by another nation's government.

What is Social Darwinism? An attitude held by many Europeans of the time that there is a natural selection among people. Only the fit or those willing to adapt to change will survive. Europeans used this idea to justify business and its taking over other countries. This basic attitude was if you don't adapt it is too bad, you were not strong enough and deserve to be conquered.

Types of Imperialism

a. **Protectorate** is a political unit that depends on another government for its protection.

an **Enclave State** means that local subject can still maintain some power and status in the new colonial territory.

Two stages of Enclave State

1. **Make it easier to get what you want because you don't have to fight with the local leaders and military.**
2. **Make government change because they don't need to pay people from homeland to act government for them.**

What is Enclave State?

Enclave State is when local elites or government officials were completely removed from power and replaced with a new set of officials brought from the ruling country. Many found that letting the natives have political rights would cause **revolutions** and they would try and take power away. It was also clear who was in charge and let the conquered power know they had no **privileges**.

Imperialism

Europe looked to **Africa** and Asia for sources of industrial **materials** and a place or market to sell the things they made in **factories**.

Imperialism in the past

Europeans looked to other countries as a way to **trade** and sell but not as a place to take over and make their **natives** more powerful than the rest.
