

The background of the cover is an aerial photograph of terraced hills. The hills are covered in lush green vegetation, and the terracing creates a series of parallel, slightly curved lines that follow the contours of the land. The lighting is soft, highlighting the texture of the fields and the overall undulating shape of the terrain.

Economics As Discourse Warren J. Samuels, 2013-04-17 1 Warren J Samuels The study of economics as discourse requires a perspective that focuses on the relationships among knowledge or truth discourse or language and meaning Central to this task is the recognition that the conduct of economic analysis uses words and that words embody meanings that are applied to the object of study but do not necessarily derive from that object although they define that object for us Knowledge Economists are engaged in efforts to understand and explain the economy In the pursuit of this knowledge they have attempted to make coherent the respects in which belief is to be accepted as knowledge or the senses in which this knowledge has the quality of truth The field of methodology in economics parallels the fields of epistemology and philosophy of science in the attempt to make sense of and to prescribe the terms on which efforts at knowledge may be accepted as true or the terms on which statements can be accepted as knowledge The conduct of such methodological inquiry typically treats economics as a science

1 2 **ECONOMICS AS DISCOURSE** engaged in the pursuit of truth as an epistemological category though there have almost always been economists who were skeptical of the status of economics as a science and the pursuit of knowledge is only one of three putative functions of economics the other two being psychic balm and social control

A Theory of Full Employment Nancy Brenner-Golomb, 2017-11-30 In A Theory of Full Employment Y S Brenner reviews the current drift toward a society he finds neither economically expedient nor morally attractive and N Brenner Golomb discusses the risks involved for science and society in the newfangled sophism hiding behind post modern ideas and political correctness Both authors emphasize the need to revive the public's political engagement and revise economic theory to restore to society the humane perspective that inspired the welfare state They contend that if people will abandon outworn habits of thought consider alternatives and renew their political engagement they may find useful employment for all who are able and willing to work and end the fear of destitution Although scientists philosophical backgrounds seldom influence their answers they do determine their questions and the final outcome can depend on this Neoclassical economists are ill equipped to ask questions about the long term dynamic processes of our complex economic reality They leave out of their models variables not easily quantified and prefer mathematical precision to the study of the intricacy of life Paul Samuelson Robert Solow and others have tried to overcome this by grouping self adjusting elements into proxy variables thus synthesizing neoclassical and Keynesian ideas But most of today's critics of the ruling dogma go largely unheard This volume is intended to convince professional economists who study the economic system as a whole to reexamine some of the assumptions behind reigning economic theories A second objective is to explain to the general public why currently fashionable policies cannot solve

massive long term unemployment Finally it shows that if political engagement is revived we may escape the economic morass and moral wasteland into which the fashionable policies have been leading us since the 1970s This book will appeal to economists politicians sociologists and a wider public concerned about today s economic malaise **CFM Review** Irvin N. Gleim, Dale L. Flesher, 2001
