liver

angiotensinogen

Renin release from kidney

Renin acts on angiotensinogen to form **angiotensin I**.

Angiotensin II also acts directly on blood vessels, stimulating vasoconstriction (narrowing).

ACE (angiotensin-converting enzyme) release from lungs

ACE acts on angiotensin I to form **angiotensin II**.

NaCl  
H<sub>2</sub>O

Angiotensin II acts on the adrenal gland to stimulate release of **aldosterone**.

Aldosterone acts on the kidneys to stimulate reabsorption of salt (NaCl) and water (H<sub>2</sub>O).

**Renin Angiotensin System and the Heart** Walmor C. De Mello, 2005-10-31 Recent studies have shown that the heart possesses an intrinsic renin angiotensin system that is controlled by tissue specific parameters that are activated by biomechanical stress This book reviews the latest information on the way in which both the plasma and cardiac renin angiotensin systems affect heart function It covers the cell and molecular biology of these systems with contributions on renin synthesis uptake and the intracellular signalling pathways Particular insight comes from transgenic mouse models in which either mouse or human genes for various components of the renin angiotensin system are expressed Other topics covered include wound healing as well as the trophic effects of aldosterone Contains the most recent findings on the renin angiotensin system and the heart Written by an international team of distinguished scientists Covers both the cellular and molecular basis of the renin angiotensin system and the clinical relevance of this research **The Local Cardiac**

**Renin-Angiotensin Aldosterone System** Edward D. Frohlich, Richard N. Re, 2009-09-18 With great pleasure we present our Third International Workshop on The Local Cardiac Renin Angiotensin Aldosterone System RAAS held at the Ochsner Clinic Foundation in November 2008 When this meeting was first organized in 2002 we were pleased that all who were invited to participate in our first workshop attended our program and what is most satisfying all of these participants returned for the second and this the third workshop In addition we are delighted that a number of additional workers in this growing field of investigation joined us for this third program Over the years since our first workshop there is little doubt as to the existence of a local RAAS in the heart Indeed there is substantial evidence as to the existence of other local systems in brain vessels adrenal and as presented in the current workshop the kidneys What is even more stimulating intellectually through duplication of local RAAS systems a remarkable yin yang biological balance is provided by nature Thus in the current third workshop considerable evidence has accumulated over the years for complicated local systems that serve to provide exquisite and unique local control of local organ functions

**Renin Angiotensin System and Cardiovascular Disease** Walmor C. DeMello, Edward D. Frohlich, 2009-09-01 This book offers the latest research into the role of the renin angiotensin system on cardiac and vascular functions and in cardiovascular diseases It covers vital aspects such as intracellular signaling and regulation of cell volume in the failing heart **The Renin Angiotensin System in Cardiovascular Disease** Naranjan S.

Dhalla, Sukhwinder K. Bhullar, Anureet K. Shah, 2023-01-01 This book on Renin Angiotensin System in Cardiovascular Disease includes 25 chapters which are organized in three sections namely i modulatory aspects ii pathophysiological aspects and iii pharmacotherapeutic aspects It includes an updated as well as comprehensive knowledge about molecular and cellular aspects for the role of the renin angiotensin system RAS in the pathophysiology and therapy of cardiovascular diseases such as hypertension atherosclerosis ischemic heart disease and heart failure This book emphasizes the molecular and cellular mechanisms signaling transduction pathways involved in the development of different cardiovascular diseases due to the

prolonged activation of RAS Furthermore biochemical mechanisms are outlined for the inhibition of this system by the blockade of angiotensin converting enzyme as well as angiotensin II type 1 receptors in patients suffering from cardiovascular abnormalities Since cardiovascular disease is the number one cause of death worldwide leading to approximately 17.9 million deaths each year there is a keen interest in understanding the pathogenesis and improving its therapy In this regard we can attest that this book provides ample information about essential components of RAS and their role in the development of cardiovascular disease From the selection of recognized global experts in their area of investigation this book can be seen to cover diverse cardiovascular aspects and molecular and cellular mechanisms of angiotensin II action for the development of different cardiovascular abnormalities It is our contention that this book will be most suitable for promoting knowledge in the field of RAS biology and will be of great interest to health professionals involved in both experimental and clinical cardiology as well as academic investigators and cardiovascular scientists graduate students and fellows worldwide

The Cardiac Renin-angiotensin System Klaus Lindpaintner, Detlev Ganten, 1994-01-01 The potential significance of the cardiac renin angiotensin system is indicated by the beneficial effects of angiotensin converting enzyme inhibitors in the treatment of congestive heart failure and regional myocardial ischemia It has become clear that the cardiac renin angiotensin system may contribute to post myocardial infarction ventricular remodeling This book details the cardiac renin angiotensin system and its importance as the key to new therapeutic strategies It will be an important addition to the library of any physician who is involved with the treatment of hypertension or congestive heart failure

Beyond the conventional Renin Angiotensin System Walmor De Mello, 2014-11-19 New Aspects of the Renin Angiotensin System in Cardiovascular and Renal Diseases Dulce Elena Casarini, Danielle Yuri Arita, Tatiana Sousa Cunha, Juliana Almada Colucci, 2016-11-03 The renin angiotensin system RAS is a hormonal system that is responsible for regulating plasma sodium ion concentration and arterial blood pressure in the body The system involves several peptides such as angiotensin I and II as well as angiotensin converting enzyme ACE to enable the constriction of arterial blood vessels in the lung Angiotensin II also stimulates the production of the hormone aldosterone in the kidneys which brings sodium ions into the bloodstream in exchange for potassium ions Malfunctions of the RAS can lead to hypertension heart failure diabetes and renal complications Thus the biochemical components of this system serve as important targets for therapeutic drugs This monograph is a compilation of updated reviews on the RAS The monograph covers describes the components of the system to explaining its physiological and clinical features in the cardiovascular system and the kidneys This is followed by sections explaining the biochemistry of the RAS system in cardiovascular and renal disease and the pharmacology of relevant therapeutic drugs Additional information on the effect of exercise states and methods to quantify angiotensins for molecular diagnosis is also presented in the concluding sections Information in the monograph will be of interest to physiologists and endocrinologists involved in medical studies or clinical practice Readers will be able to understand the RAS with a holistic
