how different kinds of expertise can limit or expand our capacity to address novel technological risks

The Politics of Expertise in Congress Bruce Bimber, 1996-08-08 CHOICE 1997 Outstanding Academic Books Nowhere in the U S government is the marriage between expertise and politics more normatively troublesome and empirically obscure than in Congress The legislature is asked to be both expert and representative to act on the best available information and judgment about policy problems while being responsive to and reflective of constituents demands This book examines the relationship between technical experts and elected officials challenging the prevailing view about how experts become politicized by the policy process Bimber presents a theory about the connections between institutional structure and the strategies of experts who participate in politics He tests this theory by tracing the interaction between Congress and the Office of Technology Assessment OTA a recently abolished legislative branch agency created in 1972 to estimate the consequences of new technologies and free Congress from complete dependence on the executive branch for information and policy analysis In addition he provides comparative portraits of Congress's remaining support agencies the Congressional Budget Office the Congressional Research Office and the General Accounting Office and argues that the legislative context for the politics of expertise reveals patterns that have been overlooked in studies of expert knowledge and executive branch policymaking
