Cardinal Tetras Herbert R. Axelrod, 1980-01-01 [Conservation of Tropical Rainforests](#) Brian Joseph McFarland, 2017-11-14 This book critically engages with how the conservation of tropical rainforests is financed. Beginning with the context of tropical deforestation alongside an overview of tropical ecology, global environmental policy, and finance, the book reviews several conservation financing instruments. These include ecotourism and private reserves, debt for nature swaps, and government domestic budgetary expenditures for state and national parks. Tropical deforestation and forest degradation are serious global environmental issues contributing to global climate change, species extinction, and threatening the livelihoods of forest-dependent communities. Yet many leading companies, individuals, and governments are making a positive impact on tropical forest conservation to mitigate greenhouse gas emissions through the use of conservation finance. *Conservation of Tropical Rainforests* tells the history of international conservation finance and provides a variety of options for individuals, businesses, and governments to support conservation financing projects.
