question to what extent training programs might offer valuable approaches to improve the quality of assessments and to implement high assessment competences Another important field which is closely related to teachers competences concerns the question how teachers professional development is linked to students learning and learning outcomes In recent years the societal demand for evidence that teachers professional development will result in improved student learning outcomes is increasing This volume brings together questions on assessment training and learning in the professional development of teachers which have not been fully discussed yet The identification of these research gaps was the reason for dedicating a series of lectures given at the University of Luxembourg 2012 to the topic of professionalization of teachers in these domains Therefore this book contains contributions from outstanding international scholars in different academic disciplines to present ideas about open research questions concerning the domains of assessment training and learning in the professional development of teachers
