styles and priorities in concert with the current needs of children Palfrey s central thesis is that society has lost sight of
children and as a result we have done a very poor job of structuring the environment to nurture them as they grow Ironically
communities are breaking apart just at the time when families need them the most leaving children vulnerable confused and
isolated The health consequences include poor school performance behavioral problems injuries early sexuality drug and
alcohol use weapons possession homicide and suicide The medical professions can have a major impact in reversing these
social and health problems Palfrey has designed this book to equip such professionals with the conceptual frame data base
