*St. Nicholas* Mary Mapes Dodge,1897      Green Worlds of Renaissance Venice Jodi Cranston,2019-03-04 From  
celebrated gardens in private villas to the paintings and sculptures that adorned palace interiors Venetians in the sixteenth  
century conceived of their marine city as dotted with actual and imaginary green spaces This volume examines how and why  
this pastoral vision of Venice developed Drawing on a variety of primary sources ranging from visual art to literary texts  
performances and urban plans Jodi Cranston shows how Venetians lived the pastoral in urban Venice She describes how they  
created green spaces and enacted pastoral situations through poetic conversations and theatrical performances in lagoon  
gardens discusses the island utopias found invented and mapped in distant seas and explores the visual art that facilitated  
the experience of inhabiting verdant landscapes Though the greening of Venice was relatively short lived Cranston shows  
how the phenomenon had a lasting impact on how other cities including Paris and London developed their self images and  
how later writers and artists understood and adapted the pastoral mode Incorporating approaches from eco criticism and  
anthropology Green Worlds of Renaissance Venice greatly informs our understanding of the origins and development of the  
pastoral in art history and literature as well as the culture of sixteenth century Venice It will appeal to scholars and
