Feminist Ecocriticism
Douglas A. Vakoch,2012-08-09 After uncovering the oppressive dichotomies of male female and nature culture that underlie contemporary environmental problems Feminist Ecocriticism focuses specifically on emancipatory strategies employed by ecofeminist literary critics as antidotes asking what our lives might be like as those strategies become increasingly successful in overcoming oppression Thus ecofeminism is not limited to the critique of literature but also helps identify and articulate liberatory ideals that can be actualized in the real world in the process transforming everyday life Providing an alternative to rugged individualism for example ecofeminist literature promotes a more fulfilling sense of interrelationship with both community and the land In the process of exploring literature from ecofeminist perspectives the book reveals strategies of emancipation that have already begun to give rise to more hopeful ecological narratives

Karen Warren, Nisvan Erkal, 1997-05-22 A summary of the ecofeminist movement

Ecocriticism. A New Response to Indian Poetry from Tagore to Present Naseer Khan, 2014-11-12 Document from the year 2014 in the subject English Language and Literature Studies Other grade Ecopoetry language English abstract Eco poetry is an emerging field of this postmodern world We find that the poetry was taken as a piece of romantic enjoyment but the recent trends in research have changed its place in the literary canon and the new Eco poetic genre is being created to make an academic atmosphere for the safeguard of the environment In 1962 William Carson in his study Silent Spring wrote that the pesticides that American s use has a negative effect on the species as well as on human body Carson s argument gave world a new eco consciousness and they made efforts to preserve the ecosystem Human beings were in great slumber and they were not knowing which color there is of and it was with the maiden discovery of Apollo 11 which not only made its maiden landing on the moon but it kept human consciousness in zeal when it took the photographs of the earth and these photographs made us realize that the globe we are living in is green and has a variety of life and rest are lifeless objects Worldwide conferences are being held to have an environmental consciousness and millions of dollars are being spent in this or that way to bring the planet in its original shape but unfortunately we say a lot and do less Therefore to give safeguard to this globe it is our prime duty to make ECO FRONTS from all sides including academic one so that globe could sustain its greenery in balance as we know that this globe is full of colors and the poets have sung about these colorful aspects not to romanticize the things but to give an ecological consciousness The present study is an eco poetic dialogue based on Indian poetry from Tagore to present and this study has tried to highlight how poetry could be helpful to save the world and its colorful species from extinction Thus the eco poetic study has tried to reveal many truths about Indian ecology as how Indian poets whether here or in Diaspora see the present Indian ecology India a growing economy on all fronts is going through a huge developmental changes The Word Ecocriticism though belongs to white race but has similar apprehension for the entire globe and the word was used by William Rueckert in Literature and Ecology An Experiment in Ecocriticism in 1978 to highlight the ecological problems depicted through literature Thus present study has tried to highlight some of the ecological problems which India is facing at

present and to show all these problems effort has been made to show an eco historical perspective Library of Congress Subject Headings Library of Congress, Library of Congress. Office for Subject Cataloging Policy, 2012 **Literature and Ecofeminism** Douglas A. Vakoch, Sam Mickey, 2018-01-19 Bringing together ecofeminism and ecological literary criticism ecocriticism this book presents diverse ways of understanding and responding to the tangled relationships between the personal social and environmental dimensions of human experience and expression Literature and Ecofeminism explores the intersections of sexuality gender embodiment and the natural world articulated in literary works from Shakespeare through to contemporary literature Bringing together essays from a global group of contributors this volume draws on American literature as well as Spanish South African Taiwanese and Indian literature in order to further the dialogue between ecofeminism and ecocriticism and demonstrate the ongoing relevance of ecofeminism for facilitating critical readings of literature In doing so the book opens up multiple directions for ecofeminist ideas and practices as well as new possibilities for interpreting literature This comprehensive volume will be of great interest to students and scholars of ecocriticism ecofeminism literature gender studies and the environmental humanities **American Indian Literature, Environmental Justice, and Ecocriticism** Joni Adamson, 2001-01-01 Although much contemporary American Indian literature examines the relationship between humans and the land most Native authors do not set their work in the pristine wilderness celebrated by mainstream nature writers Instead they focus on settings such as reservations open pit mines and contested borderlands Drawing on her own teaching experience among Native Americans and on lessons learned from such recent scenes of confrontation as Chiapas and Black Mesa Joni Adamson explores why what counts as nature is often very different for multicultural writers and activist groups than it is for mainstream environmentalists This powerful book is one of the first to examine the intersections between literature and the environment from the perspective of the oppressions of race class gender and nature and the first to review American Indian literature from the standpoint of environmental justice and ecocriticism By examining such texts as Sherman Alexie s short stories and Leslie Marmon Silko s novel Almanac of the Dead Adamson contends that these works in addition to being literary are examples of ecological criticism that expand Euro American concepts of nature and place Adamson shows that when we begin exploring the differences that shape diverse cultural and literary representations of nature we discover the challenge they present to mainstream American culture environmentalism and literature By comparing the work of Native authors such as Simon Ortiz with that of environmental writers such as Edward Abbey she reveals opportunities for more multicultural conceptions of nature and the environment More than a work of literary criticism this is a book about the search to find ways to understand our cultural and historical differences and similarities in order to arrive at a better agreement of what the human role in nature is and should be It exposes the blind spots in early ecocriticism and shows the possibilities for building common ground a middle place where writers scholars teachers and environmentalists might come together to work for social and environmental change
