Embrace and The Saints of Ornalá Frankenstein's Daughters Jane L. Donawerth, 1997-04-01 Women Science fiction authors past and present are united by the problems they face in attempting to write in this genre an overwhelmingly male dominated field Science fiction has been defined by male centered scientific discourse that describes women as alien others rather than rational beings This perspective has defined the boundaries of science fiction resulting in women writers being excluded as equal participants in the genre Frankenstein's Daughters explores the different strategies women have used to negotiate the minefields of their chosen career they have created a unique utopian science formulated by and for women with women characters taking center stage and actively confronting oppressors This type of depiction is a radical departure from the condition where women are relegated to marginal roles within the narratives Donawerth takes a comprehensive look at the field and explores the works of authors such as Mary Shelley Marion Zimmer Bradley Ursula K Le Guin and Anne McCaffrey

Playing Hard at Life Etty Cohen, 2013-05-13 Playing Hard at Life brings contemporary relational thinking to bear on the psychodynamic treatment of a notably difficult group of young patients Working with New York City teenagers who have survived the wars of inner city life and Israeli teenage soldiers who have survived the wars of the Middle East author Etty Cohen documents the extraordinary challenges of forming a treatment alliance with these shattered youngsters of engaging them psychodynamically and of working toward a viable termination The result is not only a poignant record of courage and commitment on the part of patient and therapist alike but also a valuable extension of modern trauma theory to adolescence as a developmental stage with its own challenges and requirements The heart and strength of Cohen's book is her vivid documentation of hands on encounters with her adolescent patients seen both individually and in group Cohen makes plain that with young people so horrendously traumatized treatment assures a necessarily improvisational character And yet she argues even in the type of pragmatic encounters dictated by massive and repeated trauma contemporary relational theory provides a compass with which to navigate through the rocky shoals of the clinical work Again and again the reader is shocked by just how much happened to these adolescents astonished at how resilient they proved to be and finally moved by how much Cohen was able to accomplish with them Her relational approaches to these treatments teamed with her realization that work with multiply traumatized adolescents cannot be structured in the manner of conventional therapy makes this book an invaluable timely and deeply sobering contribution to the literature
