Ebais Critiques:

Banking on Health Shiri Noy, 2017-09-18 This book addresses the puzzle of why the World Bank was unable to effect sweeping neoliberal health reforms in Latin America from the 1980s onward Through the use of quantitative regional data together with interview and archival data collected during fieldwork in Argentina Costa Rica Peru and Washington DC this book argues that the answer to this puzzle is twofold First the World Bank has not promoted a uniformly neoliberal monolithic agenda in health Second countries autonomy and capacity in this sector shape how the World Bank is involved in reforms Finally the book distinguishes neoliberal ends from means in health sector reform and traces changes in banking on health over time

In Pursuit of Health Equity Eric D. Carter, 2023-07-05 Throughout Latin America social medicine has been widely recognized for its critical perspectives on mainstream understandings of health and for its progressive policy achievements Nevertheless it has been an elusive subject hard to define with puzzling historical discontinuities and misconceptions about its origins Drawing on a vast archive and with an ambitious narrative scope that transcends national borders Eric D Carter offers the first comprehensive intellectual and political history of the social medicine movement in Latin America from the early twentieth century to the present day While maintaining a consistent focus on health equity social medicine has evolved with changing conditions in the region Carter shows how it shaped early Latin American welfare states declined with the dominance of midcentury technocratic health planning resurged in the 1970s in solidarity against authoritarian regimes and later resisted neoliberal reforms of the health sector He centers socialist and anarchist doctors political exiles intellectuals populist leaders and rebellious technocrats from Argentina Chile Brazil and other countries who responded to and shaped a dynamic political environment around health equity The lessons from this history will inform new thinking about how to achieve health equity in the twenty first century

Criticism after Critique Jeffrey R. Di Leo, 2014-09-04 Presenting different ways to imagine criticism without critique this collection provides a survey of both the difficult times facing ideological critique and the ways in which literary criticism and aesthetics have been affected by changing attitudes toward critique

The Limits of Critique Rita Felski, 2015-10-20 Why do critics feel impelled to unmask and demystify the works that they read What is the rationale for their conviction that language is always withholding some important truth that the critic's task is to unearth what is unsaid naturalized or repressed These are the features of critique a mode of thought that thoroughly dominates academic criticism In this book Rita Felski brilliantly exposes critique's more troubling qualities and proposes alternatives to it Critique she argues is not just a method but also a sensibility one best captured by Paul Ricoeur's phrase the hermeneutics of suspicion As the characteristic affect of critique suspicion Felski shows helps us understand critique's seductions and limitations The questions that Felski poses about critique have implications well beyond intramural debates among literary scholars Literary studies says Felski is facing a legitimation crisis thanks to a sadly depleted language of value that leaves the field struggling to find reasons why students should care about Beowulf or Baudelaire Why is literature worth bothering with For Felski the tendencies to make literary texts the object of suspicious reading or conversely impute to them qualities of critique forecloses too many other possibilities Felski offers an alternative model that she calls postcritical reading Rather than looking behind the text for its hidden causes conditions and motives she suggests that literary scholars place themselves in front of a text reflecting on what it calls forth and makes possible Here Felski enlists the work of Bruno Latour to rethink reading as a co production between actors rather than an unraveling of manifest meaning a form of making rather than unmaking As a scholar with an abiding respect for theory who has long deployed elements of critique in her own work Felski is able to provide an insider's account of critique's limits and alternatives that will resonate widely in the humanities
