is invaluable to leaders researchers practitioners and stakeholders involved or interested in infrastructure development in developing countries **The State of African Cities, 2014** United Nations Publications,2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change

Exploring Food and Urbanism Susan Parham,Matthew Hardy,2021-09-09 Exploring Food and Urbanism looks at the ways food and cities interconnect in a diversity of places across the globe The book s focus moves from transformations in feeding the city and its hinterland in Istanbul Turkey through neighbourhoods struggling with food access in Blantyre Malawi to the challenges in making convivial public food spaces in Cairo It explores everyday buying practices in Islamabad food markets that reflect wider changes in food cultures in Pakistan The possibilities for growing food in suburban Cape Town in South Africa are tested while possibilities for sharing meals using online methods to bring cooks and eaters together are considered across the Netherlands This edited volume makes clear that globally food is critical to sustainable urbanism everywhere across cities from kitchens to gardens food markets food shops streets squares neighbourhoods cities suburbs and hinterlands It shows how food cultures practices and economics are closely intertwined with how places are planned and designed even if this is not always fully recognised The editors of the book conclude that food can and should contribute to responding to the challenges presented by the worsening climate emergency through a focus on sustainable urbanism The chapters in this book were originally published as a special issue of the Journal of Urbanism Food and Nutrition Security in Southern African Cities Bruce Frayne,Jonathan Crush,Cameron McCordic,2017-12-22 Urban population growth is extremely rapid across Africa and this book places urban food and nutrition security firmly on the development and policy agenda It shows that current efforts to address food poverty in Africa that focus entirely on small scale farmers to the exclusion of broader socio economic and infrastructural approaches are misplaced and will remain largely ineffective in ameliorating food and nutrition insecurity for the majority of Africans Using original data from the African Food Security Urban Network s AFSUN extensive database it is demonstrated that the primary food security challenge for urban households is access to food Already linked into global food systems and value chains Africa s supply of food is not

necessarily in jeopardy Rather the widespread poverty and informal urban fabric that characterizes Africa s emerging cities impinge directly on households capacity to access food that is readily available Through the analysis of empirical data collected from 6 500 households in eleven cities in nine countries in Southern Africa the authors identify the complexity of factors and dynamics that create the circumstances of widespread food and nutrition insecurity under which urban citizens live They also provide useful policy approaches to address these conditions that currently thwart the latent development potential of Africa s expanding urban population **Britannica Book of the Year** ,2015 *The World Factbook* ,2016
