

# THE COSMIC MIND-BOGGGLING BOOK

An Illustrated Guide That Uses  
Your Senses to Bring the Wonders  
of the Universe down to Earth

**Neil McAleer**

With a Foreword by Robert Jastrow

- If you could hold a square mile of sunlight in your hand, it would weigh three pounds.
- If you could float through the rings of Saturn, the particles around you would look like fluffy snow and sparkle like colored glass.
- If a kernel of popcorn were dropped on a neutron star, it would produce as much energy as a World War II atomic bomb.
- If our solar system (the Sun and nine planets) could fit into a coffee cup, our Galaxy would be the size of North America.
- If an advanced galactic civilization responds at the speed of light to Earth's first extraterrestrial transmission (sent in 1974), we'll get the message in A.D. 51,974.
- If Earth-sized planets lined up and waited their turns, the biggest black hole could gobble them up 3.52 to the second, 111 million a year.
