Cost Estimating And Analysis:

Cost Analysis and Estimating Roland Kankey, Jane Robbins, 2012-12-06 The environment for today's cost estimator and analyst is certainly very challenging. Computerization, software, robots, composites, uncertainty, and integrated systems all challenge the applicability of our existing tools and techniques. These Proceedings serve to document some of the completed and on-going research in the dynamic world of costing. This document is published in conjunction with the first Society of Cost Estimating and Analysis (SCEA) National Conference held in Boston, MA, June 19-21, 1991. It serves to foster and promote cost research and to provide a forum to report these findings in furtherance of public interest. This volume is the third of the series. The first and second were published in conjunction with the 1989 ICNNE Joint Conference in Washington, D.C. and the 1990 ICNNE Joint Conference in Los Angeles. My thanks to our Editors, Professor Jane Robbins and Dr. Roland Kankey, our Managing Editor, Mr. Frank Hett, the Program Chair, Ms. Ann Marie Sweet, and all those who contributed. R. R. Crum, President, Society of Cost Estimating and Analysis. PREFACE We wish to thank the professionals who submitted papers to us for review. As any editor will indicate, you cannot review or publish papers that are not submitted. The articles in this Proceedings successfully completed the referee process. Each of these authors was rewarded by an additional cycle of minor changes, word processing, and express mailings.

Cost Analysis and Estimating Willis R., Jr. Greer, Daniel A. Nussbaum, 2012-12-06 Changes in production processes reflect the technological advances permeating our products and services. U.S. industry is modernizing and automating. In parallel, direct labor is fading as the primary cost driver while engineering and technology-related cost elements loom ever larger. Traditional labor-based approaches to estimating costs are losing their relevance. Old methods require augmentation with new estimating tools and techniques that capture the emerging environment. This volume represents one of many responses to this challenge by the cost analysis profession. The Institute of Cost Analysis (ICA) is dedicated to improving the effectiveness of cost and price analysis and enhancing the professional competence of its members. We encourage and promote exchange of research findings and applications between the academic community and cost professionals in industry and government. The 1990 National Meeting in Los Angeles, jointly sponsored by ICA and the National Estimating Society (NES), provides such a forum. Presentations will focus on new and improved tools and techniques of cost analysis. This volume is the second in a series. The first was produced in conjunction with the 1989 National Meeting of ICA/NES in Washington, D.C. The articles in this volume, all refereed, were selected from about 100 submitted for presentation at the Los Angeles meeting.
