Corruption And Governance In Asia:

Corruption and governance in Asia J. Kidd, F. Richter, 2002-11-14 This book delves into the nature of governance in Asia both at government and corporate level It reviews the history and suggests potential solutions for years of underperformance due to the corrupt practices that have developed because of a poor understanding of corporate governance The authors are experts in practices in Asia and their views are expressed in a sympathetic manner at no time insisting that a western model of governance is correct Instead the authors advise local models appropriate to the state of development and suggest that individual countries institute behavioural models that will mature as nations quickly develop in an increasingly global world

Corruption and Good Governance in Asia Nicholas Tarling, 2007-05-07 Bringing together contributions on the nature of corruption in East and Southeast Asia this edited volume examines the means of limiting and ultimately eliminating corruption at a national and international level Taking a country by country approach the text explores the concept of corruption now and in the past recent experiences of Asian countries at the macro and micro levels practical local and international measures to constrain corruption The volume outlines key principles of good governance and the policies and practices essential for their application As such it represents an extremely valuable contribution to our understanding of corruption and how to tackle the problem

Corruption in Asia Timothy Lindsey, Howard W. Dick, 2002 Multilateral and bilateral aid agencies now direct much of their East Asia activities to so called governance reform Almost every major development project in the region must now be justified in these terms and will usually involve an element of legal institutional reform anti corruption initiatives or strengthening of civil society and often a mix of all of these Most are in fact major exercises in social engineering Aid agencies and major multilateral players like the IMF the World Bank and the Asian Development Bank are attempting not just to improve governance systems and combat corruption but implicitly to restructure entire national political systems and administrative structures Conditionality puts real weight behind these projects If successful they could transform the face of East Asia Defining governance and understanding corruption are therefore not minor issues of terminology However a great deal of optimism is required to believe that social engineering for good governance will succeed in either Indonesia or Vietnam within the foreseeable future In Indonesia there is neither the political will nor the mechanism to act since the legal system is itself utterly corrupted Better laws have been passed but they fail in implementation In Vietnam the problems are somewhat different but the outcomes are similar Corruption is widely recognised to be a major political social and economic issue even by the Party itself but few cases are ever tried The bureaucracy including the legal system and the party are so complicit that reform is impossible These systemic problems point to the basic flaw in the good governance agenda and strategy A politically powerful alliance of foreign and domestic interests is necessary Foreign multilateral agencies donors and NGOs are able to set the international policy agenda but their domestic allies are politically weak In the absence of rule of law the basic institutions of these transitional societies remain

largely as they were and there is as yet no viable alternative system in either Indonesia or Vietnam. The argument of this book is that more might be achieved sooner by much better understanding of political, legal, commercial and social dynamics in Indonesia and Vietnam, not as they are meant to be but as they are. Multilateral agencies, donors, NGOs, business firms and scholars on the one hand, and local politicians, bureaucrats, business people, lawyers, journalists, academics and NGOs on the other hand, have much usefully to discuss. Only out of that dialogue, a dialogue between the world as it is and the world of ideals, can steady progress be made. This book examines these problems initially in an abstract, theoretical sense, before testing the frameworks thus established through a series of case studies of Indonesia and Vietnam, two very different Asian states: one Vietnam still socialist but in difficult transition from command economy to a limited market structure, the other Indonesia embracing a market economy and an emerging democratic system, one with a Confucian legal and political tradition, the other not, one with a socialist, the other a civil law legal system. The book is divided into three parts. The first, Frameworks, establishes some theoretical approaches to the problem of corruption and governance, including a East European example. The second part looks at case studies from Indonesia, and the third part looks specifically at Vietnam. Relevant legislation and judicial decisions can be found in the table of cases, and a detailed glossary and list of abbreviations will assist readers unfamiliar with the countries under examination.
