Cosmos And Consciousness:

What is Reality? Ervin Laszlo, 2016-10-04 Ervin Laszlo's tour de force What is Reality is the product of a half century of deep contemplation and cutting edge scholarship Addressing many of the paradoxes that have confounded modern science over the years it offers nothing less than a new paradigm of reality one in which the cosmos is a seamless whole informed by a single coherent consciousness manifest in us all Bringing together science philosophy and metaphysics Laszlo takes aim at accepted wisdom such as the dichotomies of mind and body spirit and matter being and nonbeing to show how we are all part of an infinite cycle of existence unfolding in spacetime and beyond Augmented by insightful commentary from a dozen scholars and thinkers along with a foreword by Deepak Chopra and an introduction by Stanislav Grof What is Reality offers a fresh and liberating understanding of the meaning and purpose of existence

Cosmos and Consciousness Stephen Blaha, 2002 This book represents a simple idea with profound implications for science and philosophy It develops a new foundation at both a popular and technological level of current fundamental theories

Circles and the Cross Loren Wilkinson, 2023-08-21 Circles and the Cross is an invitation to explore two mysteries One is the miracle of the cosmos why is there something and not nothing The other is the miracle of consciousness why should this collection of stardust be an I and not just an it Our basic response to those mysteries is wonder and from wonder have grown the three great trees of human culture religion art and science This exploration is undertaken in the light of a third mystery the cross of Christ is the clearest picture we have of the triune Creator of both cosmos and consciousness That self emptying of the Creator out of love for the creation helps us understand the pleasures paradoxes and pains of science it helps us understand how evolution can be another name for creation it casts light on the Enlightenment and Romanticism In particular it illuminates the environmental movement an ethic in search of a religion Loren Wilkinson drawing on fifty years of teaching and writing about our relationship to creation invites you to join this journey into understanding how the cross of Christ sheds light on the mysteries that surround us and gives us hope in a difficult age

Cosmic Consciousness M. D. Richard Maurice Bucke, 2011-03 Cosmic Consciousness A Study in the Evolution of the Human Mind is Richard Bucke's theory that our mental states are evolving and that to date we have experienced three stages in the development of consciousness the simple consciousness of animals the self consciousness of the vast majority of humans reason self awareness imagination etc and in some cases cosmic consciousness a mystical state of being beyond self consciousness and the next stage of human development Bucke hypothesized that cosmic consciousness is slowly beginning to appear in humans and will eventually

spread widely throughout the human race He posited that certain notable individuals throughout history have demonstrated that they have attained cosmic consciousness In the book he cites examples such as Jesus Buddha Mohammed Dante St Paul Francis Bacon William Blake and his close friend Walt Whitman Whitman an American poet and journalist described cosmic consciousness as ineffable light light rare untellable light beyond all signs descriptions and languages At the age of thirty five Bucke found himself in this elevated mental state and he describes in the third person the manifestations leading up to it 1 The person suddenly without warning has a sense of being immersed in a flame or rose colored cloud or perhaps rather a sense that the mind is itself filled with such a cloud of haze 2 At the same instant he is as it were bathed in an emotion of joy assurance triumph salvation 3 Simultaneously or instantly following the above sense and emotional experiences there comes to the person an intellectual illumination quite impossible to describe Like a flash there is presented to his consciousness a clear conception a vision in outline of the meaning and drift of the universe He does not come to believe merely but he sees and knows that the cosmos which to the self conscious mind seems made up of dead matter is in fact far otherwise is in very truth a living presence He sees that instead of men being as it were patches of life scattered through an infinite sea of non living substance they are in reality specks of relative death in an infinite ocean of life He sees that the life which is in man is eternal as all life is eternal that the soul of man is as immortal as God is that the universe is so built and ordered that without any peradventure all things work together for the good of each and all that the foundation principle of the world is what we call love and that the happiness of every individual is in the long run absolutely certain He goes on to say The person who passes through this experience will learn in the few minutes or even moments of its continuance more than in months or years of study and he will learn much that no study ever taught or can teach After reading Bucke s writings P D Ouspensky the respected Russian Philosopher echoed his comments in his book Tertium Organum Cosmic Consciousness is a third form which is as far above Self Consciousness as is that above Simple Consciousness The prime characteristic Cosmic Consciousness is as its name implies a consciousness of the cosmos that is of the life and order of the universe Along with the consciousness of the cosmos there occurs an intellectual enlightenment or illumination which alone would place the individual on a new plane of existence would make him almost a member of a new species **Cosmos** Ervin

Laszlo,2010-06-21 We stand at the threshold of a revolutionary and empowering new vision of the world The discoveries of leading edge science and the insights of spirituality are converging to reveal that the CosMos and all that we term reality is wholly integrated and that at its most fundamental level it is a field of information This is the elemental cosmic mind from which everything emanates is manifested and to which all ultimately returns Research is also demonstrating what the mystics of all traditions have discerned that we have the innate ability to envision understand and experience the CosMos at levels far beyond the limitations of our human persona CosMos is co authored by two explorers who combine almost a century of seeking to understand not only how the world is as it is but why Philosopher Ervin Laszlo Ph D and healer and

scientist Jude Currivan Ph D offer a revisioned view of the world that is no longer fragmented but is at last whole Theirs is a perception of a meaningful and co creative world that is exquisitely tuned to be as simple as it can be for consciousness to explore itself In these momentous times the vision shared in Cosmos invites us to open our hearts and minds to re member who we really are and to take our places as conscious co creators of our realities and of our evolving cosmic destiny

Cosmic Consciousness Richard Maurice Bucke,2011-01-27 This work published in 1901 is the culmination of a lifetime of research and contemplation in which Richard Maurice Bucke 1837 1902 expounds his theory of the development and evolution of consciousness in living things He uses his own experiences those of contemporaries such as Tennyson and of historical figures such as Francis Bacon as evidence for moments of higher consciousness and intellect known as cosmic consciousness Bucke s theory is of three states of progressive consciousness attained through evolution The Simple Consciousness of animals Self Consciousness of man to understand his place in the universe and Cosmic Consciousness where man might grow to understand the life and order of the cosmos This pinnacle of understanding is a progression assisted by evolution that Bucke hopes will one day come to all men A thought provoking book at any time full of optimism for the intellectual future of the human race [The Self-Actualizing Cosmos](#) Ervin Laszlo,2014-03-02 An exploration of the current revolution in scientific thought and the newest scientific findings in support of the Akashic field Explains how the new Akasha paradigm recognizes the interconnection of all things in space and time through the quantum resonance of the Akashic field Reveals the cosmos to be a self actualizing self organizing whole bringing forth life and consciousness in countless universes Explores the latest discoveries in the sciences of life mind and cosmos Science evolves through alternating phases of normal science and radical shifts that create scientific revolutions We saw this at the turn of the 20th century when science shifted from a Newtonian worldview to Einstein s relativity paradigm and again with the shift to the quantum paradigm Now as we recognize the nonlocal interconnection of all things in space and time we find our scientific worldview shifting once again With contributions by physicists Paul A LaViolette and Peter Jakubowski pioneering systems scientist Ervin Laszlo explores the genesis of the current revolution in scientific thought and the latest findings in support of the Akashic field He explains how the burgeoning Akasha paradigm returns our way of thinking to an integral consciousness a nonlinear mode of understanding that enables us to accept the reality of nonlocal interconnection throughout the world This new inclusive way of understanding reaffirms the age old instinctive comprehension of deep connections among people societies and nature and it integrates and transcends classical religious and scientific paradigms Providing examples from cutting edge science of quantum resonance based interactions among all living systems Laszlo shows the cosmos of the Akasha to be a self actualizing self organizing whole where each part is in coherence with all others and all parts together create the conditions for the emergence of life and consciousness The advent of the Akasha paradigm marks a new stage in science s understanding of the fundamental nature of the world and offers unique guidance for contemporary efforts to

create a peaceful and sustainable world Cosmic Consciousness Richard Maurice Bucke,1923 *Mind and Cosmos* Thomas Nagel,2012-10-01 The modern materialist approach to life has conspicuously failed to explain such central mind related features of our world as consciousness intentionality meaning and value This failure to account for something so integral to nature as mind argues philosopher Thomas Nagel is a major problem threatening to unravel the entire naturalistic world picture extending to biology evolutionary theory and cosmology Cosmos and Psyche Richard Tarnas,2006-01-19 A groundbreaking book that explores how astrology can inform our understanding of the events that have shaped our world the inspiration for the docuseries Changing of the Gods In these pages distinguished philosopher and cultural historian Richard Tarnas traces the connection between cosmic cycles and archetypal patterns of human experience Based on thirty years of meticulous research and on thinkers from Plato to Jung *Cosmos and Psyche* explores the planetary correlations of epochal events like the French Revolution the two world wars and September 11 This brilliant book points to a radical change in our understanding of the cosmos shining new light on the drama of history and on our own critical age It opens up a new cosmic horizon that reunites science and religion intellect and soul modern reason and ancient wisdom Whether read as astrology updated for the quantum age or as a contemporary classic of spirituality *Cosmos and Psyche* is a work of immense sophistication deep learning and lasting importance **Works of Thomas Hill Green: Philosophical works** Thomas Hill Green,1885 *Cosmic Consciousness* Richard M. Bucke,2007-12-01 Wildly arrogant stunningly bombastic and undeniably fascinating This 1901 work the masterpiece of an eclectic genius whose life encompassed medical science mystical transcendence and prospecting for gold posits a higher form of sentience that only a few humans have ever achieved among them Jesus Buddha Mohammed Dante William Blake and the author himself of course As Bucke shares his metaphysical experience of the cosmic consciousness and offers evidence for the few instances in history of its occurrence it may as well be frankly stated at once that the view of the present editor is that Francis Bacon wrote the Shakespeare plays and poems the reader may well be moved to throw this bizarre and highly intriguing book furiously across the room if the reader can put it down at all that is Canadian mystic and doctor RICHARD MAURICE BUCKE 1837 1902 was a pioneer in the medical treatment of mental illness his famous friendship with Walt Whitman was the subject of the 1992 movie Beautiful Dreamers He also wrote *Man s Moral Nature* 1879 and an 1883 authorized biography of Whitman *Works of Thomas Hill Green ...* Thomas Hill Green,1908 *Philosophical works.- vol. Cosmic Consciousness and Human Excellence Mahmoud Masaeli,Rico

Sneller,2019-01-29 Cosmoconsciousness or cosmic consciousness is a term used to characterize a transcendence of the limits of self consciousness As an ultra state of illumination of the mind the roots of the conception are embodied in the quest for a spiritual connection with multi dimensional cosmos This quest searches for spiritual development as a pathway to human excellence and can be associated with the mystics of ancient wisdom as well as contemporary psycho spiritual analysts After its emergence in the late 19th century cosmic consciousness rapidly became a source of inspiration for transpersonal psychology moral therapy and a thoughtful link to mystical quantum physics By encouraging a spiritual way of perceiving the real world cosmic consciousness also provides a source of inspiration for human excellence as the central idea of global ethics In this perspective the world cannot be changed for the better without changing individual consciousness Global concerns including ecological issues violence and acts of terrorism materialistic gratification and hedonism could not be addressed effectively unless people s consciousness is changed Cosmic consciousness by the very perception of the inner life has the potential to struggle with global concerns and hence it holds a promise of human excellence This book discusses cosmic consciousness against the backdrop of the emergence of the rational and autonomous conception of the self and the modern psychological depiction of selfhood It places the idea of cosmic consciousness at the centre of contemporary arguments on the nature of consciousness

Looking In, Seeing Out Minas C. Kafatos,1991-10-01 Most books on science and mysticism attempt to link modern physics to philosophic views of consciousness This book explores the two as parallel

processes one outer one inner Our outward search is for objective reality out there in the world But what we experience as outer is linked to what we can know in ourselves subjectively The inward search is for that level of consciousness that underlies all subjective experience spoken of by the mystics Like other recent others Drs Kafatos and Karatou find parallels between Eastern thought and recent scientific developments in quantum theory and cosmology But they go farther and hold that the realms of consciousness and the objective world are complementary aspect of the same reality Their approach is fresh and unique and shows how we are involved in the cosmic process
