The Geography of Manitoba John Welsted, John Everitt, Christoph Stadel, 1996-03-15 Manitoba is more than one of Canada's three prairie provinces Encompassing 649 950 square kilometres its territory ranges from Canadian Shield to grassland parkland and subarctic tundra Its physical geography has been shaped by ice age glaciers while its human geography reflects the influences of its various inhabitants from the First Nations who began arriving over 9 000 years ago to its most recent immigrants This fascinating range of geographical elements has given Manitoba a distinct identity and makes it a unique area for study Geography of Manitoba is the first comprehensive guide to all aspects of the human and physical geography of this unique province Representing the work of 47 scholars and illustrated with over 200 maps diagrams and photographs it is divided into four main sections covering the major areas of the province's geography Physical Background People and Settlements Resources and Industry and Recreation As well as studying historical developments the contributors to Geography of Manitoba analyse recent political and economic events in the province including the effect of federal and provincial elections and international trade agreements They also comment on future prospects for the province considering areas as diverse as resource management and climatic trends

Natives and Settlers Now and Then Paul W. DePasquale, 2007-06-15 Beginning with the premise that Canada is engaged in the era of treaty implementation Natives and Settlers discounts the myth of a postcolonial Canada Informed by a colonial past that remains refracted in the current understanding and treatment of Native peoples this collection reinterprets treaty making rights title and land claims from Aboriginal perspectives In the spirit of ongoing dialogue essays by Sharon Venne Patricia Seed Harold Cardinal Frank Tough and Erin McGregor bring new insights to the interpretations of signed treaties and pre contact treaty making processes examine land claims still under negotiation and demonstrate the vitality of Aboriginal laws and paradigms in a country new to decolonization and nation building

Wet Prairie Shannon Stunden Bower, 2011-06-29 The Canadian prairies are often envisioned as dry windswept fields however much of southern Manitoba is not arid plain but wet prairie poorly drained land subject to frequent flooding Wet Prairie brings to light the complexities of surface water management in Manitoba from early artificial drainage efforts to late twentieth century attempts at watershed management Irregular water flow patterns challenged the checkerboard

landscape of the 1872 federal Dominion Lands Act and homesteaders found their agricultural ambitions at odds with local environmental realities Thus in keeping with liberal principles the provincial government undertook substantial drainage efforts Flooding and drainage became the subjects of intense and persistent debate among provincial officials drainage experts and Manitoba residents New alliances and rivalries emerged amid shifting social political and environmental contexts with enduring consequences for both the landscapes and people of the wet prairie This account of an overlooked aspect of Prairie environmental history traces how the biophysical nature of southern Manitoba helped shape both Manitoba society and the provincial state
