Handbook of Adolescent Health Risk Behavior Ralph J. DiClemente, William B. Hansen, Lynn E. Ponton, 1996-01-31 This reference provides a comprehensive assessment of adolescent health risk behaviors such as smoking violence teen pregnancy and AIDS among many others Experts describe trends and changes in risk behaviors over time illustrate theoretical models useful for understanding adolescent risk taking behavior and developing preventive interventions review the state of the science with respect to prevention strategies for each risk behavior and identify effective treatment modalities

Handbook of Adolescent Health Risk Behavior Ralph J. DiClemente, William B. Hansen, Lynn E. Ponton, 2013-11-21 Adolescence is a developmental period of accelerating physical psychological social cultural and cognitive development often characterized by confronting and surmounting a myriad of challenges and establishing a sense of self identity and autonomy It is also unfortunately a period fraught with many threats to the health and well being of adolescents and with substantial consequent impairment and disability Many of the adverse health consequences experienced by adolescents are to a large extent the result of their risk behaviors Many adolescents today and perhaps an increasing number in the future are at risk for death disease and other adverse health outcomes that are not primarily biomedical in origin In general there has been a marked change in the causes of morbidity and mortality among adolescents Previously infectious diseases accounted for a disproportionate share of adolescent morbidity and mortality At present however the overwhelming toll of adolescent morbidity and mortality is the result of lifestyle practices

Adolescent Risk-taking Judith Ann Mumford, 2001 Practitioners policy makers and parents agree that a potentially high cost in terms of personal familial and societal well being is associated with adolescent risk taking in America The focus of this study was to more fully understand a risk taking teens perspectives and perceptions of themselves and their worlds b the meanings that teens who engage in risk

taking attach to those behaviors and c who and or what influences teens to engage in troubled behaviors A qualitative research approach which lends itself particularly well to exploration of this topic was used Fourteen residents at a facility for adolescents who had engaged in various risk taking behaviors were interviewed by the researcher Perceptions and attitudes regarding their behaviors themselves their families and their peers were explored Consistent with previous research findings common themes that emerged included a relation between adolescent risk taking and the following the desire to be independent of parental authority the influence of peers lack of familial cohesiveness parental unavailability and poor parent child communication and low academic achievement In contrast to previous research findings no pattern emerged associating adolescent risk taking and either parenting style or family religiosity The Culture of Adolescent Risk-Taking Cynthia Lightfoot,1997-03-14 An in depth exploration of the relationship between adolescent risk taking and peer group culture based on extensive interviews with teens themselves this elegantly written book shows that taking risks is a natural and necessary part of growing up The author proposes that risks are declarations of the self worn like badges of autonomy or defiance or group membership With a broad interpretive approach locating human action within the symbolic forms communicative practices and shared idioms of culture Cynthia Lightfoot elucidates the cultural and psychological processes through which risk acquires meaning for teenagers and vividly depicts the drama and daring of adolescent social life

Adolescent Risk Taking Nancy J. Bell,Robert W. Bell,1993-01-14 With a focus on adolescents this volume explores such questions as whether similarities exist between different types of risk taking such as mountain climbing and criminal behaviour whether an examination of risk taking behaviour will shed light on problem behaviours such as unprotected sex and whether there are positive aspects to adolescent risk taking With contributions from psychology sociology medicine and public policy the volume uses risk taking as a framework to study many dangerous and often life threatening adolescent behaviours Following a review of research topics discussed include theories of risky choice the use of rational choice theory in predicting heightened risk taking sociobiological facto **Special Issue: Adolescent Risk-taking Behavior** Denis Medeiros,1998 Correlates Of Risk-Taking Behaviors Among Adolescents Solomon Negash,2013 Even if risk behaviors are not limited to one period of life adolescence has a special importance since risk behaviors to a large extent established in this period Despite the fact that some adolescent risk behaviors can be considered to be developmentally normative and appropriate the engagement in multiple risk behaviors during adolescence may increase the likelihood of undesirable outcomes Various factors have been associated with adolescents involvement in risk taking behaviors These include parental behaviors peer influence and adolescent risk perception Because of their curiosity enthusiasm and urge to try and see new phenomenon a considerable number of youth have become addicted to alcohol smoking cigarette chewing khat dangerous medical drugs and narcotics drug These multiple risk behavior is detrimental to many health hazards that challenge adolescents proper physical mental and psychological development *Positive Risk Taking in Adolescence* Natasha Tahrgol

Duell,2018 Adolescents evince a more heightened propensity for risk taking than children and adults This propensity can be directed toward negative e g illegal or health compromising or positive e g socially acceptable and beneficial risk behaviors Much existing research on adolescent risk behavior focuses on negative risk taking due to the public health implications of engaging in these behaviors However it is also important for society to promote youth engagement in positive risk behaviors that may benefit the well being of adolescents and those around them The present study explored positive risk taking in a sample of 164 American adolescents 45% female ages 16 20 M 17 9 SD 72 There were three central aims 1 develop a reliable self report measure of positive risk taking and examine its association with self reports of negative risk taking and several behavioral measures of risk taking 2 explore the extent to which previously established psychological correlates of negative risk taking are also associated with positive risk taking 3 determine whether positive risk taking is associated with indicators of positive functioning such as academic orientation grit and mental health Results indicated that positive risk taking was associated with greater self reported negative risk taking and greater risk taking feedback learning and punishment sensitivity on experimental risk taking tasks Although positive risk taking was not associated with grit or internalizing symptoms positive risk taking was positively associated with stronger school engagement and better school performance Future directions and applications to positive youth development programming are discussed

Brief Prevention for Adolescent Risk-taking Behavior Elizabeth J. D'Amico, Kim Fromme, 2002 *Adolescent Risk-taking and Social Meaning*, 2008 Why do adolescents take risks What is the appropriate response to adolescent risk taking This Commentary for a special issue of *Developmental Review* discussing a set of papers in that issue explores these questions with attention to changes in the adolescent brain to dual processing theory to social influences and to fuzzy trace theory It contends that adolescent risk taking is often driven by the social meaning of risk and caution and that social meaning operates as a tax on or a subsidy to behavior Changes in social meaning present a serious collective action problem but also a valuable opportunity for both law and policy

Adolescent Risk-taking Behavior Lucy H. Lewis, 2000 **Adolescent Risk-taking and Alcohol Use** James K. Giese, 1995 Analysis of Adolescent Risk Taking Heather Hebert, 1997 Risk-Taking Behavior in Adolescence: Exploring the Roles of Family, Peers, and School Andrea LaDoris Davis, 2016 Adolescence is filled with continuous transitions and growth Many adolescents are at risk for involvement in risk taking behavior due to insufficient socially supportive relationships to and within multiple social environments Research has revealed specific contextual factors that are protective against and may even reduce various types of risk taking behavior The purpose of this study was to investigate associations between contextual factors and risk taking behavior using a nationally representative sample of adolescents Ecological theory and attachment theory were used as frameworks for viewing and understanding adolescent risk taking behavior Data for this study were taken from the Wave 1 and Wave 2 in home questionnaires of the public use dataset of the National Longitudinal Study of Adolescent to Adult Health The samples in this study consisted of 4

908 adolescents in Wave 1 and 2 832 adolescents in Wave 2 Both samples were comprised of White and Black adolescents enrolled in grades 7-12 Statistical analyses were conducted on the overall samples and by ethnicity Findings from correlational analyses indicated that there were significant relationships between the contextual factors and risk taking behavior for the overall samples and ethnic samples across both waves Comparisons of the contextual factors with risk taking behavior revealed similar patterns that existed for some of the predictors across concurrent and longitudinal models Multigroup analyses using structural equation modeling showed that metric invariance was not attained however partial metric invariance was found for risk taking behavior Specific risk taking behavior indicators e.g. smoking and drinking had factor loadings which differed among Black and White adolescents Results for the multigroup analyses of the contextual model that employed partial metric invariance for risk taking behavior showed no differences in the contextual factors for Black and White adolescents The implications for practice limitations and suggestions for future research regarding associations between the contextual factors and risk taking behavior were discussed
