

The background of the book cover is a dark, textured surface composed of a grid of small, dark red spheres. Each sphere has a subtle glow and a small, bright red spot on its surface. In the lower right quadrant of the cover, there is a single, larger, bright blue sphere that stands out prominently from the rest of the grid.

Survival Analysis with Long-Term Survivors Ross A. Maller, Xian Zhou, 1996 The aim of this book is to suggest and exemplify a systematic methodology for analysing survival data which contains immune or cured individuals denoted generically as long term survivors Such data occurs in medical and epidemiological applications where the intention may be to identify whether or not cured or immune individuals are present in a population perhaps as a result of treatments given in the analysis of recidivism data in criminology where the intentions are similar with respect to prisoners released from and possibly returning to prison and in many other areas where followup data is available on individuals with the possibility that not all suffer the event under investigation Both nonparametric and parametric methods are proposed and developed The effects of covariate information can be assessed via a kind of generalised linear framework in the parametric analyses The proposed methodologies are supported by asymptotic analyses and simulations of real situations While these theoretical underpinnings are presented in reasonable rigour and detail the book is aimed very much at the practitioner who wishes to analyse survival data with or even without immunes
