Country Forecasts:

International Business Information Ruth A. Pagell, Michael Halperin, 1999 Changes in the economy required business professionals and researchers to learn about new sources of information as well as to expand their understanding of international business subjects The sources language document coding and definitions are different truly foreign International Business Information was written to help business *International Business Information* Michael Halperin, Ruth A. Pagell, 2024-02-02 This newly updated and expanded edition of a reference bestseller is the only work available that guides business researchers and librarians to the most valuable sources for information on international business and shows how to interpret and use that data The authors discuss the best available resources and how to use them to find answers to a wide range of questions about international business They also describe business practices in various regions and countries the basics of international trade and finance international business organizations and relevant political departments and agencies Many exhibits and tables are included and the book's appendices include glossaries checklists for evaluating sources and sample disclosure documents *Global Economic Prospects 2010* World Bank, 2010-02-12 The crisis has deeply impacted virtually every economy in the world and although growth has returned much progress in the fight against poverty has been lost More difficult international conditions in the years to come will mean that developing countries will have to place even more emphasis on improving domestic economic conditions to achieve the kind of growth that can durably eradicate poverty Justin Yifu Lin Chief Economist and Senior Vice President The World Bank *Global Economic Prospects 2010 Crisis Finance and Growth* explores both the short and medium term impacts of the financial crisis on developing countries Although global growth has resumed the recovery is fragile and unless business and consumer demand strengthen the world economy could slow down again Even if as appears likely a double dip recession is avoided the recovery is expected to be slow High unemployment and widespread restructuring will continue to characterize the global economy for the next several years Already the crisis has provoked large scale human suffering Some 64 million more people around the world are expected to be living on less than a 1 25 per day by the end of 2010 and between 30 000 and 50 000 more infants may have died of malnutrition in 2009 in Sub Saharan Africa than would have been the case if the crisis had not occurred Over the medium term economic growth is expected to recover But increased risk aversion a necessary and desirable tightening of financial regulations in high income countries and measures to reduce the exposure of developing economies to external shocks are likely to make finance scarcer and more costly than it was during the boom period As a result just as the ample liquidity of the early 2000s prompted an investment boom and an acceleration in developing country potential output higher costs will likely yield a slowing in developing country potential growth rates of between 0 2 and 0 7 percentage points and as much as an 8 percent decline in potential output over the medium term In the longer term however developing countries can more than offset the implications of more expensive international finance by reducing the cost of

capital channeled through their domestic financial markets For more information please visit www.worldbank.org gep2010 To access Prospects for the Global Economy an online companion publication please visit www.worldbank.org/globaloutlook

Global Economic Prospects, January 2016 World Bank Group,2016-02-02 The January 2016 edition of Global Economic Prospects discusses current global and regional economic developments and prospects analyzing key challenges and opportunities confronting developing countries This volume addresses among other topics spillovers from large emerging markets and macroeconomic vulnerabilities during resource development Global Economic Prospects is a World Bank Group Flagship Report Semiannually January and June it examines global economic developments and prospects with a special focus on developing countries The report includes analysis of topical policy challenges faced by developing countries through in depth research in the January edition and shorter analytical pieces in the June edition **Globalization, Today and Tomorrow** Gerard F.
