20 Embodied Practices for Healing Trauma and Addiction Jan Winhall, 2025-03-18 Trauma and addiction heal in tandem with this paradigm shifting approach What if addiction dissociation and other manifestations of trauma were not framed as diseases or disorders but rather as adaptive methods of regulating the autonomic nervous system ANS This book takes that approach and guides readers through 20 embodied practices that promote the rewiring of the ANS By integrating the latest neuroscience from Stephen Porges s Polyvagal Theory with Eugene Gendlin s embodied felt sense Jan Winhall s Felt Sense Polyvagal Model is a paradigm shifting deeply somatic approach to healing trauma and addiction Readers are presented with two vital tools for

healing learning how to recognize and rewire their autonomic state and finding the felt sense of somatic wisdom This compassionate and inviting model centers the intelligence of the body to allow for deep healing and these 20 step by step exercises present an accessible approach for clinicians their clients and anyone on the journey to healing from trauma and addiction The book s exercises are uniquely designed to be completed either with a mental health professional another person engaged in this embodied process a felt sense partner or both *Patients with Mental Disease, Mental Defect, Epilepsy, Alcoholism and Drug Addiction in Institutions in the United States* National Committee for Mental Hygiene,1921

Addictive Behaviour D. Colin Drummond,1995-07-11 Addictions are responsible for vast and growing morbidity mortality and misery in society Until now not only has the theoretical underpinning of the most commonly practised treatment approaches in the addictions field been scant but the evidence for the effectiveness of these methods has also been generally lacking In the cue exposure paradigm there is a rare opportunity to make a vital connection between theory and practice in the rational development of new treatment approaches Cue exposure has become a routine clinical procedure in the treatment of phobic and obsessive compulsive disorders and shows promise in the additions field There is always a danger however that new approaches will become adopted into routine practice in an uncritical fashion This book therefore brings together a series of invited reviews specially prepared by addictions experts from around the world Together these reviews provide a much needed critical analysis of the evidence The primary audience for the book is clinical psychologists and psychiatrists interested in addictions However it will also appeal to all graduates in these fields as a teaching and reference work *United States of America V.
