Family Storytelling Jody Koenig Kellas, 2013-09-13. Stories and storytelling are one of the primary ways that families and family members make sense of both everyday and difficult events, create a sense of individual and group identity, remember, connect generations, and establish guidelines for family behavior. With so many important functions, storytelling is a significant but still understudied communicative process for the family. Family Storytelling focuses on the ways in which stories are told in and about family in order to provide insight into the processes, functions, and consequences of family storytelling. This collection of empirical articles illuminates various ways in which family storytelling affects and reflects the negotiation of individual and relational identity in the family, teaches important family lessons, and helps members make sense of and cope with difficulty. Each of these functions is explored through both scientific and interpretive investigations, thus showcasing the contributions that research on family storytelling from different paradigms makes to our understanding of the family. This book was originally published as a special issue of the *Journal of Family Communication*.

Handbook on the Clinical Treatment of Adopted Adolescents and Young Adults Doris Bertocci, Christopher Deeg, Linda A. Mayers, 2023-08-11. This collection bridges the voices of international scholars and adopted persons to share knowledge about clinical practice with adopted people in adolescence and early adulthood. Coming at a time when countries are beginning to focus on adoption reform, this handbook is the first to address not only the external, systemic contributions to their developmental complexities but also the underlying internal meanings of being adopted as children, become adolescents, and mature into adulthood. It explains how adopted clients differ from those not adopted and emphasizes the need for clinical research on adopted people in this older age group. Exploring how clinicians can understand their clients' clinical needs, it offers specific protocols and frameworks for assessment and necessary modifications in language and treatment. With a foreword by Miriam Steele, chapters examine the legal and sociopolitical cultures, policies, and practices in which adoption is embedded, calling for broad systemic change. Embracing theoretical, conceptual, and global perspectives, this handbook is written for clinicians in all disciplines, at all tiers of practice, administration, and training, identifying the key roles they can potentially play in expanding and better focusing our understanding of the psychology of being adopted.

What Is Your Story? Lynn Deiulis, 2021-10-21 *What is Your Story* is an engaging colourful book that gives children permission to discover their unique journey of adoption or kinship The book s goal is to normalize the questions children have while at the same time normalizing the need to ask them Divided by activity pages each chapter can be read independently and even out of order in an effort to focus on each child s specific story This book can help Parents caregivers and other adults involved in the adoption or kinship process to have open honest discussions with children about their unique stories Birth parents who want to talk about adoption and kinship with birth children they are not living with It

can help children understand their unique story of why they are not living together with their birth parents and who their birth family is Professionals who are preparing children for adoption or kinship placements as well as therapists working with children who are living through adoption or kinship processes Special note to parents caregivers Designed as a fun way to reinforce the content that you have just read together the activity pages between the chapters are also a natural way to stop reading if you or the child are feeling overwhelmed This book is more of a journey than a story and sometimes you or your child may need to stay on a chapter until it is comfortable to continue until all the feelings are felt or until all the questions are asked Just like other journeys detours and construction delays are normal and even expected Some families might need to reach out to community resources to help manage their feelings and that is encouraged There are as many ways to read this book as there are butterflies

Lost & Found Betty Jean Lifton, 2009 Explores the obstacles and issues that adoptees orphans and foster children face when they have been separated from a parent or denied the right to know their origins
