Advance Agents of American Destiny Roy F. Nichols, 1956

The American Union and the Problem of Neighborhood James E. Lewis Jr., 2000-11-09 In this book James Lewis demonstrates the centrality of American ideas about and concern for the union of the states in the policymaking of the early republic For four decades after the nation s founding in the 1780s he says this focus on securing a union operated to blur the line between foreign policies and domestic concerns Such leading policymakers as Thomas Jefferson James Madison James Monroe John Quincy Adams and Henry Clay worried about the challenges to the goals of the Revolution that would arise from a hostile neighborhood whether composed of new nations outside the union or the existing states following a division of the union At the center of Lewis s story is the American response to the dissolution of Spain s empire in the New World from the transfer of Louisiana to France in 1800 to the independence of Spain s mainland colonies in the 1820s The breakup of the Spanish empire he argues presented a series of crises for the unionist logic of American policymakers leading them finally to abandon a crucial element of the distinctly American approach to international relations embodied in their own federal union

Manifest Destiny's Underworld Robert E. May, 2002 In the first full history of 19th century American filibusters illegal invasions of foreign countries with whom the US was formally at peace May explores what drew thousands of men to join these mercenary expeditions and considers the relationship between filibustering and broader issues of American imperialism

Territories of Empire Andy Doolen, 2014 Practically speaking nineteenth century American literary history really refers to writings from the East seaboard of the United States In fact no author from the West prior to Mark Twain has been admitted into the canon of American literature a longstanding bias that continues to define the narrative arc of U S literary nationalism Western authors are absent from the canon and classroom largely because their regional writings are assumed to be second rate in comparison with the ostensibly more complex literary cultures of the eastern states Andy Doolen s monograph reorients literary history turning to the neglected Western writings that shaped the distinctive process of U S expansionism in the years following the Louisiana Purchase As Doolen shows these cartographic texts legitimated U S occupancy of contested border zones and justified the nation s move westward In five chapters *Territories of Empire* surveys an under studied

archive of these texts ranging from exploration narratives novels oratory and natural histories to autobiographies travel narratives poetry and periodical literature In writings as dissimilar as protest petitions from white Louisianans Kentucky newspaper accounts of the Burr conspiracy the explorer Zebulon Pike s 1810 account of the upper Rio Grande and Timothy Flint s 1826 novel about a young New Englander who fights in the Mexican independence struggle Americans were expanding the national imagination into new continental dimensions Ultimately these texts show how literature reflected and fed the expansionist ideology of the U S by linking national greatness to the urgent necessity of territorial and commercial growth
