

Redshift Equation and Cosmic Scale Factor

- Although the redshift in the universe is caused by the stretching of space, the Doppler equation still holds true. The **redshift ratio** in astrophysics is denoted by z and is determined by:

$$z = \frac{\Delta\lambda}{\lambda_0} \approx \frac{v}{c}$$

$\Delta\lambda$ is the change in wavelength

λ_0 is the original wavelength at the source

v is the speed at which the object is moving

Consciousness: The Final Frontier Dada Gunamuktananda, 2023-05-20 Your journey to inner peace and fulfilment Based on the popular TEDx talk of the same name Consciousness The Final Frontier takes us on a journey of self discovery Merging the esoteric and the mundane tapping into ancient and contemporary wisdom and using real life examples Dada Gunamuktananda explores the concept of our own consciousness as part of indeed one with a conscious universe He shows how to connect with the supreme teacher within us through simple and sustainable changes to our daily life These changes include following a yogic lifestyle practising meditation maintaining good hygiene and health among others This book not only puts forth the case for a conscious universe and how a life lived in consciousness leads to inner peace love and fulfilment within oneself but also how these positive feelings can overflow into love and compassion for all Combining philosophy and practice Dada explains how even in times of crisis even amidst the life challenges of today s world it is possible to not just survive but to thrive and strive for a better self and a better world *The Geomagnetic Field and Life* A. Dubrov, 2013-11-11 I am very pleased that my book *The Geomagnetic Field and Life* is being published in English in the United States Thanks to the initiative of Plenum Press a publishing house that is widely known in all countries I have a great new opportunity to make direct contact with friends throughout the world My book on the geomagnetic field can be regarded as an abstraction whose purpose is to provide a better picture and understanding of the world around us its main driving forces and factors to help us to know ourselves and to proceed further The essence of the abstraction is that in treating the problem I have deliberately ignored the diverse effects of various external factors on living organisms and have confined myself to an analysis of the effect of the GMF This approach allows me to go one step further to draw various conclusions and propose theories that might bring us closer to a proper understanding of the true nature of the phenomena Philosophers have long been aware that by such abstract thinking we can determine the nature of phenomena more reliably completely and comprehensively penetrate to the very core of the observed effects and perceive the depth of their interrelations *The Power of Yin* Hazel Henderson, Jean Houston, Barbara Marx-Hubbard, 2007-06-01 What are the best tactics to take to head off global environmental disaster Is industrial society in decline and if so how should we manage its dismantling How can humanity better integrate itself into the continuum of evolving technologies that surround us Three of the most influential feminist philosophers of the 1970s met over two weekends in 1977 and 1978 to discuss the challenges facing society in the late 20th century and their revelatory inspiring conversation reproduced here for the first time is startlingly fresh and relevant for us today as we rise to meet the challenges of the new millennium With an uplifting spiritual perspective on the human experience and a uniquely feminine approach to interacting with the universe Hazel Henderson Jean Houston and Barbara Marx Hubbard with an able assist from editor Barbara DeLaney here offer a magnificently feminist grandly humanist rousingly hopeful approach to the myriad challenges facing planet Earth and her people today *The Power of Yin* is more than

a brilliant conversation It is an invitation to women and men everywhere to express their own genius and empower their highest values and goals to seek out others who attract them in this quest for personal development to form ever deeper friendships and to join together in spirit and in action to help evolve the human community on planet Earth HAZEL HENDERSON is a world renowned futurist evolutionary economist and consultant on sustainable development JEAN HOUSTON is advisor to UNICEF in human and cultural development and a principal founder of the Human Potential Movement BARBARA MARX HUBBARD is president of the Foundation for Conscious Evolution and a cofounder of Washington D C s Committee for the Future
