and climate change He assesses the impact of new technologies new energy sources new materials and the development of artificial intelligence on business government and economics and discusses the challenges ahead the creation of new business models the need to meet people s legitimate expectations of improved living conditions while avoiding environmental catastrophe and the need to adapt ideas developed in scarcity to conditions of abundance Why is it that in countries foremost in creating post scarcity conditions millions are still in poverty and billions worldwide still lack basic necessities of life Philip Sadler agrees with those who say the relief of global poverty cannot rely on aid and corporate philanthropy He explores the idea of re engineering products and delivering them into bottom of the pyramid BOP markets and concludes that the more global companies take this route as some are already doing the more profitable they will find it and this will in turn help the poorest people who currently pay more for goods and services the poverty penalty than the rich
