1989 Body Controller:

Biomechanics and Neural Control of Posture and Movement Jack M. Winters, Patrick E. Crago, 2012-12-06 Most routine motor tasks are complex involving load transmission through out the body intricate balance and eye head shoulder hand torso leg coordination The quest toward understanding how we perform such tasks with skill and grace often in the presence of unpredictable perturbations has a long history This book arose from the Ninth Engineering Foundation Conference on Biomechanics and Neural Control of Movement held in Deer Creek Ohio in June 1996 This unique conference which has met every 2 to 4 years since the late 1960s is well known for its informal format that promotes high level up to date discussions on the key issues in the field The intent is to capture the high quality of the knowledge and discourse that is an integral part of this conference series The book is organized into ten sections Section I provides a brief introduction to the terminology and conceptual foundations of the field of movement science it is intended primarily for students All but two of the remaining nine sections share a common format 1 a designated section editor 2 an introductory didactic chapter solicited from recognized leaders and 3 three to six state of the art perspective chapters Some perspective chapters are followed by commentaries by selected experts that provide balance and insight Section VI is the largest section and it consists of nine perspective chapters without commentaries
