Architecture and Construction in Steel Alan Blanc, Michael McEvoy, Roger Plank, 2003-09-02 This book provides a comprehensive guide to the successful use of steel in building and will form a unique source of inspiration and reference for all those concerned with architecture in steel

Tubular Structures Paul Grundy, Alan Holgate, Bill Wong, 2021-10-06 Tubular structures remain a source of architectural inspiration and practical solutions to difficult performance specifications. New developments are covered in this text which contains papers on design innovations and applications presented at an international symposium held in Australia in 1994

Smithells Metals Reference Book William F. Gale, Terry C. Totemeier, 2003-12-09 Smithells is the only single volume work which provides data on all key aspects of metallic materials. Smithells has been in continuous publication for over 50 years. This 8th Edition represents a major revision. Four new chapters have been added for this edition; these focus on Non conventional and emerging materials: metallic foams, amorphous metals including bulk metallic glasses, structural intermetallic compounds and micro nano scale materials. Techniques for the modelling and simulation of metallic materials. Supporting technologies for the processing of metals and alloys. An Extensive bibliography of selected sources of further metallurgical information including books, journals, conference series, professional societies, metallurgical databases and specialist search tools. One of the best known and most trusted sources of reference since its first publication more than 50 years ago. The only single volume containing all the data needed by researchers and professional metallurgists. Fully updated to the latest revisions of international standards

Connections in Steel Structures III Reidar Bjorhovde, André Colson, Riccardo Zandonini, 1996-05-20 This book publishes the proceedings from the Third International Workshop on Connections in Steel Structures: Behaviour, Strength and Design, held in Trento, Italy, 29-31 May 1995. The workshop brought together the world's foremost experts in steel connections: research, development, fabrication and design. The scope of the papers reflects the state of the art in all areas of endeavour and manages to bring together the needs of researchers as well as designers and fabricators. Topics of particular importance include connections for composite steel-concrete structures, evaluation methods and reliability issues for semi-rigid connections and frames, and the impact of extreme loading events such as those imposed by major earthquakes. The book highlights novel methods and applications in the field and ensures that designers and other members of the construction industry gain access to the new results and procedures
