With index of authors and subjects** Guildhall Library (London, England), 1863 **A Memoir of Ralph Waldo Emerson** James Elliot Cabot, 1887 **Nobel Laureates in Chemistry, 1901-1992** James K. Laylin, 1993-10-30 Through new perspectives from a mix of original monographs biographies autobiographical memoirs edited collections of essays and documentary sources translations classic reprints and pictorial volumes this series will document the individuals ideas institutions and innovations that have created the modern chemical sciences **The Cumulative Book Index**, 1907 A world list of books in the English language *Language and History in Early England* Helmut Gneuss, 1996 This first selection of studies by Helmut Gneuss focuses on language and its development in Anglo Saxon England and at the same time demonstrates the importance of such studies for historical scholarship The first section deals with the standardization of Old English and the influence of Latin learning whether in the form of lexical borrowings or the study of grammar and related disciplines Professor Gneuss then turns to specific texts as historical sources such as the poem on the Battle of Maldon or the translation of the Rule of St Benedict a key work of the 10th century reform and in the final articles looks at the work of Gerald of Wales and William Herebert **The Knife Man** Wendy Moore, 2006-09-12 The vivid often gruesome portrait of the 18th century pioneering surgeon and father of modern medicine John Hunter When Robert Louis Stevenson wrote his gothic horror story of Dr Jekyll and Mr Hyde he based the house of the genial doctor turned fiend on the home of John Hunter The choice was understandable for Hunter was both widely acclaimed and greatly feared From humble origins John Hunter rose to become the most famous anatomist and surgeon of the eighteenth century In an age when operations were crude extremely painful and often fatal he rejected medieval traditions to forge a revolution in surgery founded on pioneering scientific experiments Using the knowledge he gained from countless human dissections Hunter worked to improve medical care for both the poorest and the best known figures of the era including Sir Joshua Reynolds and the young Lord Byron An insatiable student of all life forms Hunter was also an expert naturalist He kept exotic creatures in his country menagerie and dissected the first animals brought back by Captain Cook from Australia Ultimately his research led him to expound highly controversial views on the age of the earth as well as equally heretical beliefs on the origins of life more than sixty years before Darwin published his famous theory Although a central figure of the Enlightenment Hunter's tireless quest for human corpses immersed him deep in the sinister world of body snatching He paid exorbitant sums for stolen cadavers and even plotted successfully to steal the body of Charles Byrne famous in his day as the Irish giant In *The Knife Man* Wendy Moore unveils John Hunter's murky and macabre world a world characterized by public hangings secret expeditions to dank churchyards and gruesome human dissections in pungent attic rooms This is a fascinating portrait of a remarkable pioneer

and his determined struggle to haul surgery out of the realms of meaningless superstitious ritual and into the dawn of modern medicine
