Geoscience Abstracts ,1965 **Radiocarbon Dating Literature** Dilette Polach,1988 Although the technique of radiocarbon dating has been established and used as a research tool in a variety of fields since the late 1940s no serious effort has been made to compile a comprehensive annotated bibliography of the literature devoted to radiocarbon dating and its applications This is partly due to the multi disciplinary aspect of the topic causing indexing of radiocarbon dating literature to be scattered in a variety of abstracting services and scientific fields and also partly due to the rapid and constant growth of the literature This makes searching for literature on the general topic of radiocarbon dating a very cumbersome task Radiocarbon dating appears as an indexed subject only since 1965 however current literature shows that early works are still widely referred to indicating their importance as foundation and framework for new research Thus the selected range of the bibliography 1947 1968 fills the gap not covered by indexing services or computer information retrieval This bibliography lists over 2800 articles in the English language and the bibliography is divided into 14 chapters Within the chapters the entries are in alphabetical order by title The bibliography also has three indexes which offer access to material by author subject and geographical names
