Otto Hahn Klaus Hoffmann,2012-12-06 Otto Hahn 1879 1968 was awarded the 1944 Nobel Prize for Chemistry for his work on atomic fission his work in Berlin in the 1930s and 1940s with Lise Meitner and Fritz Strassmann led to the discovery that uranium nuclei bombarded by neutrons undergo spontaneous fission releasing enormous energies This work conveyed to England and the US by scientific refugees from Nazi Germany led to the instigation of the Manhattan Project and the development of the Atomic Bomb Reviled by many after the war as one of the people responsible for the carnage at Hiroshima and Nagasaki Hahn had already begun to reflect on the social responsibility of scientists for their fundamental discoveries and the subsequent applications of the knowledge they create Already during the war Hahn had protested Nazi restrictions on Universities and researchers and after the War he became actively involved in efforts to restrict the spread of nuclear weapons In this volume Klaus Hoffmann discusses Hahn s contributions to science and his reflections of scientific and social responsibility He concludes that Hahn s ideas can still serve as a foundation for responsible and moral actions by scientists

Strontium Contamination in the Environment Pankaj Pathak,Dharmendra K. Gupta,2019-06-04 This book provides an authoritative review of the origin and extraction of strontium and its impact on the environment It also presents the latest strontium decontamination and remediation strategies Around the globe nuclear power is being recognized as a major source of energy and is expected to play a crucial role in meeting the energy requirements of present day society However the pros and cons have to be considered and the safe disposal of large amounts of radionuclide wastes is becoming a matter of great concern These wastes encompass contaminants such as heavy metals and toxic substances which may exist in solid liquid or gaseous forms or a combination of these and as such their disposal requires particular attention The book focuses on ⁹⁰Sr which is a predominant isotope of strontium and considered an intermediate level radioactive waste with a half life of 28.8 years average biological half life of 18 years and 546 KeV decay energy Written by expert contributors it addresses occurrence

detection and extraction of strontium the chemical and nuclear properties of strontium isotopes the fate and migration of strontium in soil its bioaccumulation and its associated health impact mechanistic toxicity response as well as related regulation and remediation It appeals to scholars scientists and environmental managers working with strontium contamination in the environment and its consequences *Applications of Nuclear and Radiochemistry* Richard M. Lambrecht, Nabil Morcos, 2013-10-22 *Applications of Nuclear and Radiochemistry* is a collection of articles focusing on contemporary applied research on radioactive isotopes The monograph is based on the Second Chemical Congress of the North American Continent held at Las Vegas Nevada in August 1980 The book contains articles on developments in nuclear chemistry and radiochemistry emphasizing the topic of radiopharmaceutical chemistry The text is composed of two parts wherein the first part is comprised of papers dealing with advances in the production of radionuclides for nuclear medicine in the synthesis of labeled pharmaceuticals and in the design and use of specific diagnostic agents These sections cover research areas on machines used for research such as compact accelerators positron emission and single photon tomographs Emphasis is given to the radiochemistry and design of radiopharmaceuticals for receptor studies and for determining physiological function and metabolism of the brain heart and tumors The second part examines contemporary advances including the impact of radiochemistry in China pertaining to the fallout from Chinese nuclear tests This part also contains a section covering a list of uncommon topics The text is of interest to nuclear scientists academicians in the field of radiology and radiochemistry researchers in nuclear medicine nuclear engineers and environmental researchers **Catalogue of Courses on Nuclear Energy in the European Countries of O.E.C.D.** European Nuclear Energy Agency, 1965
