

Approaches to the Study of Politics

DIFFERENCE BETWEEN APPROACH AND METHOD

The terms "method" and "approach" are used rather loosely and occasionally even synonymously in the field of social sciences. It is possible to differentiate between the two in their usage in order to be as precise as possible. A method is a more general term that refers to a certain approach to completing a task. A method in a systematic study is a process of inquiry that allows for the acquisition of trustworthy knowledge and the production of accurate conclusions. The scientific method, inductive method, deductive method, comparative technique, etc. are some examples of methods. The phrase "approach" is broader and includes both the method (i.e., how to ask questions) and the study's emphasis (i.e., what questions to ask in order to understand the given phenomenon). "An approach consists of selection criteria—criteria employed in selecting the problems or questions to consider and in selecting the data to bring to bear; it consists of standards governing the inclusion and exclusion of questions and data," wrote Vernon Van Dyke in *Political Science: A Philosophical Analysis* in 1960. In addition, Dyke clarified the difference between an approach and a technique, saying: "In summary, approaches consist of criteria for picking problems and relevant data, whereas methods are processes for acquiring and utilizing data." However, it should be noted that a method is not always wedded to a specific approach, whereas an approach is typically wedded to a specific method. An approach also suggests the appropriate method because of this. As a result, the scientific method and the behavioural approach are inseparable (since the political situation can be studied scientifically, whereas the normative perspective is committed to the
