**Approximate Methods and Numerical Analysis for Elliptic Complex Equation** Guo Chun Wen,1999-06-11

Numerical methods for elliptic partial differential equations have been the subject of many books in recent years but few have treated the subject of complex equations In this important new book the author introduces the theory of and approximate methods for nonlinear elliptic complex equations in multiple connected domains Constructive methods are systematically applied to proper boundary value problems which include very general boundary conditions Approximate and numerical methods such as the Newton imbedding method the continuity method the finite element method the difference method and the boundary integral method as well as their applications are discussed in detail The book will be of interest to all scientists studying the theory or applications of complex analysis Boundary Value Problems, Integral Equations and Related Problems Guo Chun Wen,2011

In this volume we report new results about various boundary value problems for partial differential equations and functional equations theory and methods of integral equations and integral operators including singular integral equations applications of boundary value problems and integral equations to mechanics and physics numerical methods of integral equations and boundary value problems theory and methods for inverse problems of mathematical physics Clifford analysis and related problems Contributors include L Baratchart B L Chen D C Chen S S Ding K Q Lan A Farajzadeh M G Fei T Kosztolowicz A Makin T Qian J M Rassias J Ryan C Q Ru P Schiavone P Wang Q S Zhang X Y Zhang S Y Du H Y Gao X Li Y Y Qiao G C Wen Z T Zhang etc **Mathematical Theory in Periodic Plane Elasticity**
