Aquaculture An Introductory Text

Jin-Ying Zhang

Aquaculture An Introductory Text:

Aquaculture Zainal Muchlisin, 2012-01-27 This book provides an understanding on a large variety of aquaculture related topics The book is organized in four sections The first section discusses fish nutrition second section is considers the application of genetic in aquaculture section three takes a look at current techniques for controlling lipid oxidation and melanosis in Aquaculture products The last section is focused on culture techniques and management which is the larger part of the book The book chapters are written by leading experts in their respective areas Therefore I am quite confident that this book will be equally useful for students and professionals in aquaculture and biotechnology

Aquaculture Robert R. Stickney, 2009 Providing a broad and readable overview of the subject this updated second edition of Aquaculture An Introductory Text covers issues associated with sustainable aquaculture development culture systems hatchery methods nutrition and feeding of aquaculture species reproductive strategies harvesting and many other topics While its main focus is on the culture of fish molluscs and crustaceans for food the book also covers other forms of aquaculture such as the production of seaweeds recreational fish and ornamental species and live foods such as algae and rotifers that are used to feed larval shrimp and marine fish Printed in a new larger format and illustrated with many photos and diagrams this will be an essential resource for undergraduate students of aquaculture and related topics The scope is global and much of the information is based on first hand experiences of the author

Aquaculture, 4th Edition Robert R. Stickney, Delbert M. Gatlin III, 2022-05-16 Providing a broad and readable overview of the subject this updated fourth edition of Aquaculture An Introductory Text covers issues associated with sustainable aquaculture development culture systems hatchery methods nutrition and feeding of aquaculture species reproductive strategies harvesting and many other topics While its main focus is on the culture of fish molluscs and crustaceans for food the book also covers other forms of aquaculture such as the production of seaweeds recreational fish and ornamental species as well as live foods such as algae and rotifers that are used to feed larval shrimp and marine fish Aquaculture remains one of the most rapidly growing agricultural disciplines and this book remains an essential resource for all students of aquaculture and related disciplines

Aquaculture: An Introductory Text Diana Fletcher, 2021-11-16 The process of rearing breeding and harvesting of both aquatic animals and plants in controlled environments like rivers lakes oceans ponds and streams is known as aquaculture The practice of aquaculture serves various purposes such as food production restoration of endangered species habitat restoration creation of barrier against pollution using seaweed and mollusc and wild stock population enhancement Aquaculture can be practiced in both saltwater and freshwater Common aquaculture practices include mariculture algaculture inland pond culture and integrated multi trophic aquaculture Some common fish that are bred using aquaculture techniques are catfish salmon carp shrimp oyster and tilapia This book elucidates the concepts and innovative models around prospective developments with respect to aquaculture It is compiled in such a manner that it will provide in depth knowledge about the theory and practice

of aquaculture Coherent flow of topics student friendly language and extensive use of examples make this book an invaluable source of knowledge
