An Archaeological Evolution Stanley South,2006-10-21 Stanley South has been a leading figure not only in historical archaeology but also in anthropological archaeology His work both past and present has put him in the forefront of monumental changes in American archaeology in the last 40 years His personal perseverance in field archaeology has also been an inspiration to new and burgeoning archaeologists and anthropologists An Archaeological Evolution is a personal recounting of his life played out among some of the most important debates and movements in archaeology starting in the 1960s up to the 21st century This seminal volume will be of interest to archaeologists both professional and academic anthropologists historians and conservators in or studying the United States but also wherever archaeology is taught and practiced

Evolutionary Archaeology Patrice A. Teltser,2022-05-10 What is the role of neo Darwinian evolution in explaining variation in prehistoric behavior Evolutionary Archaeology a collection of nine papers from a variety of contributors is the first book length treatment of the evolutionists position All archaeologists and especially those with a specific interest in method and theory will find much here to challenge traditional theory solidify the evolutionists position and stir further debate Evolutionary archaeologists argue that Darwinian natural selection acts on human behavior resulting in the persistence of alternative human behaviors and the material products of those behaviors The contributors address the methodological requirements of evolutionary theory as it may apply to the nature of archaeological data Several contributors evaluate the methodological implications of basic evolutionary principles including the structure of explanations the units of evolution and analysis and the measurement of information transmission Others explore the role of specific analytic approaches such as seriation raw material sourcing and comparative and engineering analyses Still others confront the issue of reformulating archaeological problems from the point of view of evolutionary theory By focusing on the methodological requirements of evolutionary theory these essays go far in meeting the challenge of building new archaeological method The work contributes to a better understanding of cultural evolution and builds toward a new logical framework to explain variation in the archaeological record

Evolutionary Archaeology Michael John O'Brien,1996
Applying Evolutionary Archaeology Michael J. O'Brien,R. Lee Lyman,2000-03-31 This book is an in depth treatment of Darwinian evolutionism and its applicability to the investigation of the archaeological record The authors explain the unique position that this kind of evolutionism holds in science and how it bears on any attempt to explain change over time in the organic world demonstrate commonalities between archaeology and paleobiology and explain the principles methods and

techniques the systematics inherent in the approach Archaeology Dane Castaneda,2018-02-28 Archaeology is the scientific study of past cultures through analysis of physical remains Essentially physical remains are bones of early people as well as their manufactured tools goods artifacts and the foundations of settlements Archaeologists search for and analyze these remains in order to understand something about the culture of the people that left them Archaeologists often work closely with historians and anthropologists Antiquarianism is the earliest stage of archaeology Named for the process of collecting and displaying historical treasures antiquarianism was generally the domain of wealthy individuals who had the resources to spend time searching for acquiring and displaying artifacts These individuals were motivated by a variety of reasons from nationalism for instance the history of the land of their birth to religious reasons the examination of Biblical manuscripts Note that the beginnings of antiquarianism are ancient and may go back to or further than the Greek historian Herodotus in the fifth century BCE Today archaeology is a precise science Archaeologists tools include radioactive carbon dating and geophysical prospecting The discipline is strongly influenced and even driven by humanities like history and art history However it is at heart intensely methodical and technical But archaeology hasn't always been precise In fact it hasn't always been a science Archaeology originated in 15th and 16th century Europe with the popularity of collecting and Humanism a type of rational philosophy that held art in high esteem The inquisitive elite of the Renaissance collected antiquities from ancient Greece and Rome considering them pieces of art more than historical artifacts The book focuses on the present state of our understanding of archaeology of the early historic period It explores archaeological methods aims objectives and practices It addresses key issues that are traditionally associated with early historic archaeology

Evolutionary and Interpretive Archaeologies Andrew Gardner,2011-06 This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions

The Evolution of Complex Hunter-Gatherers Ben Fitzhugh,2003-07-31 This book makes a contribution to the developing field of complex hunter gatherer studies with an archaeological analysis of the development of one such group It examines the evolution of complex hunter gatherers on the North Pacific coast of Alaska It is one of the first books available to examine in depth the social evolution of a specific complex hunter gatherer tradition on the North Pacific Rim and will be of interest to professional archaeologists anthropologists and students of archaeology and anthropology *Cognitive Archaeology and Human Evolution* Sophie A. de Beaune,Frederick L. Coolidge,Thomas Wynn,2009-06-22 Cognitive

Archaeology and Human Evolution presented new directions in the study of cognitive archaeology Seeking to understand the conditions that led to the development of a variety of cognitive processes during evolution it uses evidence from empirical studies and offers theoretical speculations about the evolution of modern thinking as well The twelve essays written by an international team of scholars represent an eclectic array of interests methods and theories about evolutionary cognitive archaeology Collectively they consider whether the processes in the development of human cognition simply made a better use of anatomical and cerebral structures already in place at the beginning of hominization They also consider the possibility of an active role of hominoids in their own development and query the impact of hominoid activity in the emergence of new cognitive abilities

Der Mensch in der Psychiatrie Friedemann Pfäfflin,1988

The Quality of the Archaeological Record Charles Perreault,2024-05-31 Paleobiology struggled for decades to influence our understanding of evolution and the history of life because it was stymied by a focus on microevolution and an incredibly patchy fossil record But in the 1970s the field took a radical turn as paleobiologists began to investigate processes that could only be recognized in the fossil record across larger scales of time and space That turn led to a new wave of macroevolutionary investigations novel insights into the evolution of species and a growing prominence for the field among the biological sciences In *The Quality of the Archaeological Record* Charles Perreault shows that archaeology not only faces a parallel problem but may also find a model in the rise of paleobiology for a shift in the science and theory of the field To get there he proposes a more macroscale approach to making sense of the archaeological record an approach that reveals patterns and processes not visible within the span of a human lifetime but rather across an observation window thousands of years long and thousands of kilometers wide Just as with the fossil record the archaeological record has the scope necessary to detect macroscale cultural phenomena because it can provide samples that are large enough to cancel out the noise generated by micro scale events By recalibrating their research to the quality of the archaeological record and developing a true macroarchaeology program Perreault argues archaeologists can finally unleash the full contributive value of their discipline

Evolutionary Archaeology Michael John O'Brien,1996 This book assembles articles that show how to apply scientific evolutionism to the study of variation in the archaeological record It delineates the approach to the past in which artefacts are viewed as parts of human phenotypes and thus are subject to selection in the same manner as any somatic feature

The Evolutionary Archaeology of Ceramic Diversity in Ancient Fiji Ethan E. Cochrane,2009 The research presented here investigates the evolution of material cultural diversity in the Yasawa Islands in the northwestern corner of the Fijian archipelago This work builds upon several field seasons of basic research in the Yasawas as well as other large scale ceramic analyses in Fiji This study constructs answers using an explanatory framework explicitly designed to account for the evolution of cultural diversity in prehistory This explanatory framework combines the effects of cultural transmission selection and other sorting processes and innovation Using this

explanatory framework this research attempts to answer the following three questions 1 What domains of ceramic similarity in the Yasawa Islands can be used to define culturally transmitting populations or lineages 2 What are the spatial and temporal distributions of transmission lineages defined along different avenues of transmission and 3 What are the possible explanations for the distribution of these lineages Chapter 2 examines some of the previous archaeological and other research in Fiji that has attempted to explain or document cultural biological and linguistic diversity Chapter 3 more completely develops the theoretical framework used to explain prehistoric ceramic similarities and difference in terms of transmission lineages An outline of the natural and cultural history of the Yasawa Islands is presented in Chapter 4 Classifications of ceramic variation and other analyses are presented in Chapter 5 In Chapter 6 cladistic and seriation analyses generate hypotheses for the transmission history of Yasawa Islands populations Chapter 7 reviews the results of this research in the context of other archaeological work in Fiji The approach to explaining cultural similarities and differences employed in this research indicates that prehistoric cultural diversity can be examined using cultural transmission selection and innovation to produce empirically testable hypotheses regarding the historical relatedness of populations The further development of this approach by scholars will do much to answer long standing questions

Kansas Archaeology Robert J. Hoard, William E. Banks, 2006 Synthesizes what is known about the cultural human history of Kansas from 10 000 B C to the nineteenth century This significant contribution to Plains archaeology provides the reader with the first comprehensive overview of the subject in nearly fifty years

Cultural Phylogenetics Larissa Mendoza Straffon, 2016-02-10 This book explores the potential and challenges of implementing evolutionary phylogenetic methods in archaeological research by discussing key concepts and presenting concrete applications of these approaches The volume is divided into two parts The first covers the theoretical and conceptual implications of using evolution based models in the sociocultural domain illustrates the sorts of questions that these methods can help answer and invites the reader to reflect on the opportunities and limitations of these perspectives The second part comprises case studies that address relevant empirical issues such as inferring patterns and rates of cultural transmission detecting selective pressures in cultural evolution and explaining the nature of cultural variation This book will appeal to archaeologists interested in applying evolutionary thinking and inferential methods to their field and to anyone interested in cultural evolution studies

Style and Function Teresa D. Hurt, Gordon Rakita, 2001 This text presents theoretical background and case studies that demonstrate how evolutionary definitions of archaeological style and function may be applied to the prehistoric record

Lithic Technological Systems and Evolutionary Theory Society for American Archaeology. Annual Meeting, 2015-01-22 This collection of essays brings together several different evolutionary perspectives to demonstrate how lithic technological systems are a byproduct of human behavior The essays cover a range of topics including human behavioral ecology cultural transmission phylogenetic analysis macroevolution and various applications of evolutionary

ecology *Pattern and Process in Cultural Evolution* Stephen Shennan, 2009-03-31 This volume offers an integrative approach to the application of evolutionary theory in studies of cultural transmission and social evolution and reveals the enormous range of ways in which Darwinian ideas can lead to productive empirical research the touchstone of any worthwhile theoretical perspective While many recent works on cultural evolution adopt a specific theoretical framework such as dual inheritance theory or human behavioral ecology *Pattern and Process in Cultural Evolution* emphasizes empirical analysis and includes authors who employ a range of backgrounds and methods to address aspects of culture from an evolutionary perspective Editor Stephen Shennan has assembled archaeologists evolutionary theorists and ethnographers whose essays cover a broad range of time periods localities cultural groups and artifacts
