## **Birds Of Nebraska Their Distribution And Temporal Occurrence:**

Birds of Nebraska Roger S. Sharpe, W. Ross Silcock, Joel G. Jorgensen, 2001-01-01 Nebraska sits at the nexus of continental bird migration and serves as a home either permanently or seasonally for nearly 450 species. Major migratory routes pass through the state creating numerous opportunities to observe the great variety of North American bird species. The annual crane migrations in spring are legendary and other key events include winter concentrations of bald eagles flocks of up to thirty thousand grebes mergansers and gulls at Lake McConaughy in late fall and incredible concentrations of waterfowl in the Rainwater Basin in early spring. *Birds of Nebraska* captures the variety of Nebraska's ornithological possibilities in a style useful to hobbyists and professionals alike. For the first time in Nebraska ornithology the authors have provided an exhaustive summary of state bird records compiled into concise but readable accounts of all species of birds reported in the state. This work covers taxonomy, early and late migration dates, high counts, nesting areas, and likely viewing locations.

**Birding Nebraska's Central Platte Valley and Rainwater Basin** Paul Johnsgard, 2015-12-03 Central Nebraska's Platte River and Rainwater Basin are primary stops in the migration patterns of numerous North American waterfowl including sandhill and whooping cranes, sandpipers, geese, ducks, gulls, and shorebirds of many types. Upland species also abound there as well. The region's most eminent ornithologist provides birding and travel information for casual tourists and hard-core enthusiasts: locations, seasons, events, routes, accommodations, contacts, etc. A complete species list is also included. This birders' guide is as essential as your boots and binoculars.

*The Nature of Nebraska* Paul A. Johnsgard, 2005-01-01 Where the eastern and western currents of American life merge as smoothly as one river flows into another is a place called Nebraska. There we find the Platte, a river that gave sustenance to the countless migrants who once trudged westward along the Mormon and Oregon trails. We find the Sandhills, a vast region of sandy grassland that represents the largest area of dunes and the grandest and least disturbed region of mixed grass prairies in all the Western Hemisphere. And below it all we find the Ogallala aquifer, the largest potential source of unpolluted water anywhere. These ecological treasures are all part of the nature of Nebraska. With characteristic clarity, energy, and charm, Paul A. Johnsgard guides us through Nebraska's incredible biodiversity, introducing us to each ecosystem and the flora and fauna it sustains, and inviting us to contemplate the purpose and secrets of the natural world as we consider our own roles and responsibilities in our connection with it.

A Nebraska Bird-Finding Guide Paul Johnsgard, 2011-04-27 Nebraska lies in the transition zone between North American eastern and western avifaunas and is home to more than 200 breeding and 150 migrant species. This definitive guide to Nebraska birdwatching by the state's preeminent ornithologist includes a county-by-county rundown of the best sites, a calendar of migrations, an annotated checklist of regularly occurring Nebraska birds, and recommendations for optical equipment, publications, and reference materials, and contact information for conservation and ornithological groups. It features 48 maps as well as photographs and drawings by the author, Paul Johnsgard, Foundation Professor.
