National Capitalisms, Global Production Networks Christel Lane,Jocelyn Probert,2009-03-19 Firms in the clothing
 industry engage in global sourcing and operate in global markets Their global production networks have often been subject
 to scrutiny as the power relationships between buyer firms in developed countries and supplier firms in developing countries
 raise issues concerned with fast fashion the role of brands labour standards in developing countries job losses among the
 most vulnerable workers in Europe and the US and the growing differentiation within the bloc of developing countries
 between the least developed and fast developers such as China and India This book analyses the way British American and
 German firms in the clothing industry manufacturing and retail co ordinate and govern their global production networks
 value chains It offers a multi level study concerned with processes of economic interaction between international regional
 and national economic institutions and actors This combines an analysis of international regional regulatory systems global
 markets and conditions in the developing countries where suppliers are found with a focus on the recent development of the
 clothing industry in three western countries The analysis of firms global networks focuses on the power relationships
 between western producers and retailers on the one hand and between buyer firms in developed and supplier firms in
 developing countries on the other as well as their impact on labour Utilising over one hundred interviews in six countries on
 three continents it follows the value chain from developed to developing countries and studies the many issues which
 confront students of globalization at the current time The study combines theoretical perspectives from economic sociology
 political economy and management and seeks to utilise the complementary strengths of the Varieties of Capitalism approach
 and that of Global Production Networks Value Chains It will appeal to advanced students and academics interested in
 processes of economic globalization and the way firms manage them as well as to those looking for a study of the clothing
 industry which combines theoretical depth with broad empirical coverage Electrical & Electronics Abstracts ,1997
