Hassan, 2011-12-10 One of the early set of reforms that South Africa embarked on after emerging from apartheid was in the water sector following a remarkable consultative process The policy and legal reforms were comprehensive and covered almost all aspects of water management including revolutionary changes in defining and allocating rights to water radical reforms in water management and supply institutions the introduction of the protection of environmental flows and major shifts in charging for water use and in the provision of free basic water Over ten years of implementation of these policy and legislative changes mean that valuable lessons have already been learned and useful experiences gained in the challenge of effective water resources
