Global Tuberculosis Report 2018 World Health Organization,2018-11-20 WHO has published a global TB report every year since 1997 The main aim of the report is to provide a comprehensive and up to date assessment of the TB epidemic and of progress in prevention diagnosis and treatment of the disease at global regional and country levels This is done in the context of recommended global TB strategies and targets endorsed by WHO s Member States and broader development goals set by the United Nations UN The 2018 edition of the global TB report was released on 18 September in the lead up to the first ever UN High Level Meeting on TB on 26 September 2018 *National tuberculosis prevalence surveys 2007-2016*

,2021-05-03 Between 2007 and the end of 2016 24 countries implemented a total of 25 national tuberculosis prevalence surveys using methods recommended by WHO The 25 surveys consisted of 13 in Asia and 12 in Africa Collectively survey findings have informed the policies plans and programmatic actions needed to address gaps in TB diagnosis and treatment and to reduce the burden of TB disease Finally the 24 countries have a robust baseline for assessing progress towards new global targets set in the UN Sustainable Development Goals 2016 2030 and WHO s End TB Strategy 2016 2035 The methods results successes achieved challenges faced and lessons learned from the 25 surveys were comprehensively documented in the book We viewed such a product as a global public good that should be available to all those with an interest in and commitment to using survey findings now and in the future e g academics donors public health officers and national TB programmes As with implementation of the 25 surveys themselves the book is the result of a major global regional and national collaborative and collective effort with more than 450 contributors from all around the world **Global**

Tuberculosis Control World Health Organization,2006 This is the 10th WHO annual report on surveillance planning and financing for global tuberculosis control including data on case notifications and treatment outcomes from 200 national TB control programmes and an analysis of plans budgets expenditures and progress in DOTS Directly Observed Therapy Short Course strategies for 22 high burden countries Eleven consecutive years of data are now available to assess progress towards the Millennium Development Goals targets for TB control Findings include that in 2004 there were nine million new cases of TB and an estimated two million deaths from TB including those co infected with HIV The TB incidence rate was stable or falling in five out of six WHO regions with the number of cases rising in Africa where the TB epidemic is still driven by the spread of HIV More than 80 per cent of all TB patients live in sub Saharan Africa and Asia **Global Tuberculosis Report 2012** World Health Organization,2012 The World Health Organization WHO Global Tuberculosis Report 2012

provides the latest information and analysis about the tuberculosis TB epidemic and progress in TB care and control at global regional and country levels It is based primarily on data reported by WHO s Member States in annual rounds of global TB data collection In 2012 182 Member States and a total of 204 countries and territories that collectively have more than 99% of the world s TB cases reported data Executive summary p 1 *The Health of Newcomers* Patricia Illingworth, Wendy E. Parmet, 2017-01-24 Immigration and health care are hotly debated and contentious issues Policies that relate to both issues to the health of newcomers often reflect misimpressions about immigrants and their impact on health care systems Despite the fact that immigrants are typically younger and healthier than natives and that many immigrants play a vital role as care givers in their new lands native citizens are often reluctant to extend basic health care to immigrants choosing instead to let them suffer to let them die prematurely or to expedite their return to their home lands Likewise many nations turn against immigrants when epidemics such as Ebola strike under the false belief that native populations can be kept well only if immigrants are kept out In *The Health of Newcomers* Patricia Illingworth and Wendy E Parmet demonstrate how shortsighted and dangerous it is to craft health policy on the basis of ethnocentrism and xenophobia Because health is a global public good and people benefit from the health of neighbor and stranger alike it is in everyone s interest to ensure the health of all Drawing on rigorous legal and ethical arguments and empirical studies as well as deeply personal stories of immigrant struggles Illingworth and Parmet make the compelling case that global phenomena such as poverty the medical brain drain organ tourism and climate change ought to inform the health policy we craft for newcomers and natives alike
