Aquinas Continuum Compact:

The Protection of Traditional Knowledge at the Frontiers of Drug Discovery Peter S Harrison, 2024-09-19 This book concerns the often fractious interface between drug discovery and commercialisation environmental degradation the biodiversity crisis the exploitation of indigenous peoples and the destruction of their culture the right to health inequalities of power and the ability of the law to protect knowledge For millennia medicinal plants have provided a trove of treatments for human ailments and the key to that treasure has been the traditional knowledge of the indigenous peoples who have lived alongside these plants More recently that knowledge has been taken often without consent or recompense by Western science as a springboard for the development of pharmaceutical agents As a response to threats to biodiversity and indigenous culture international mechanisms have created or are creating enforceable rights for indigenous peoples to control such knowledge With a background in pharmacology and molecular biology and significant experience as a lawyer in pharmaceutical and biotech patent litigation the author brings a fresh perspective to understanding the difficulties of enforcing such rights and in particular examines whether there is a philosophically justifiable limit to the downstream scope of such rights This book is aimed at all those with an interest in the control of indigenous genetic knowledge and the protection of indigenous culture whether academics anthropologists or pharmaceutical researchers and those seeking to make indigenous rights work as activists legislators or practising lawyers

Shared Mission Leonardo Franchi, 2024 This book is a contribution to scholarship in the field of religious education Its aim is simple to offer a critical perspective on the nature of religious education in the light of contemporary developments in Catholic thinking in catechesis and wider thinking in education Part One revolves around four historical contexts selected specifically to illuminate contemporary developments in the field Part Two explores the complex genealogy of the relationship between catechesis and Religious Education including relevant Magisterial documents and associated academic literature Part Three proposes that a Spirituality of Communion should underpin the Church's work in catechesis education and Religious Education The revised edition contains an appendix on the Global Compact on Education

Universal Grammar and Narrative Form David Herman, 1995 In a major rethinking of the functions methods and aims of narrative poetics David Herman exposes important links between modernist and postmodernist literary experimentation and contemporary language theory Ultimately a search for new tools for narrative theory his work clarifies complex connections between science and art theory and culture and philosophical analysis and narrative discourse Following an extensive historical overview of theories about universal grammar Herman examines Joyce's *Ulysses* Kafka's *The Trial* and Woolf's *Between the Acts* as case studies of modernist literary narratives that encode grammatical principles which were re-fashioned in logic linguistics and philosophy during the same period Herman then uses the interpretation of universal grammar developed via these modernist texts to explore later twentieth century cultural phenomena The problem of citation in the discourses of postmodernism for example is discussed with reference to

syntactic theory An analysis of Peter Greenaway's *The Cook The Thief His Wife and Her Lover* raises the question of cinematic meaning and draws on semantic theory In each case Herman shows how postmodern narratives encode ideas at work in current theories about the nature and function of language Outlining new directions for the study of language in literature *Universal Grammar and Narrative Form* provides a wealth of information about key literary linguistic and philosophical trends in the twentieth century
